

DisplayView

Easily Manage and Control InFocus Panels and Projectors

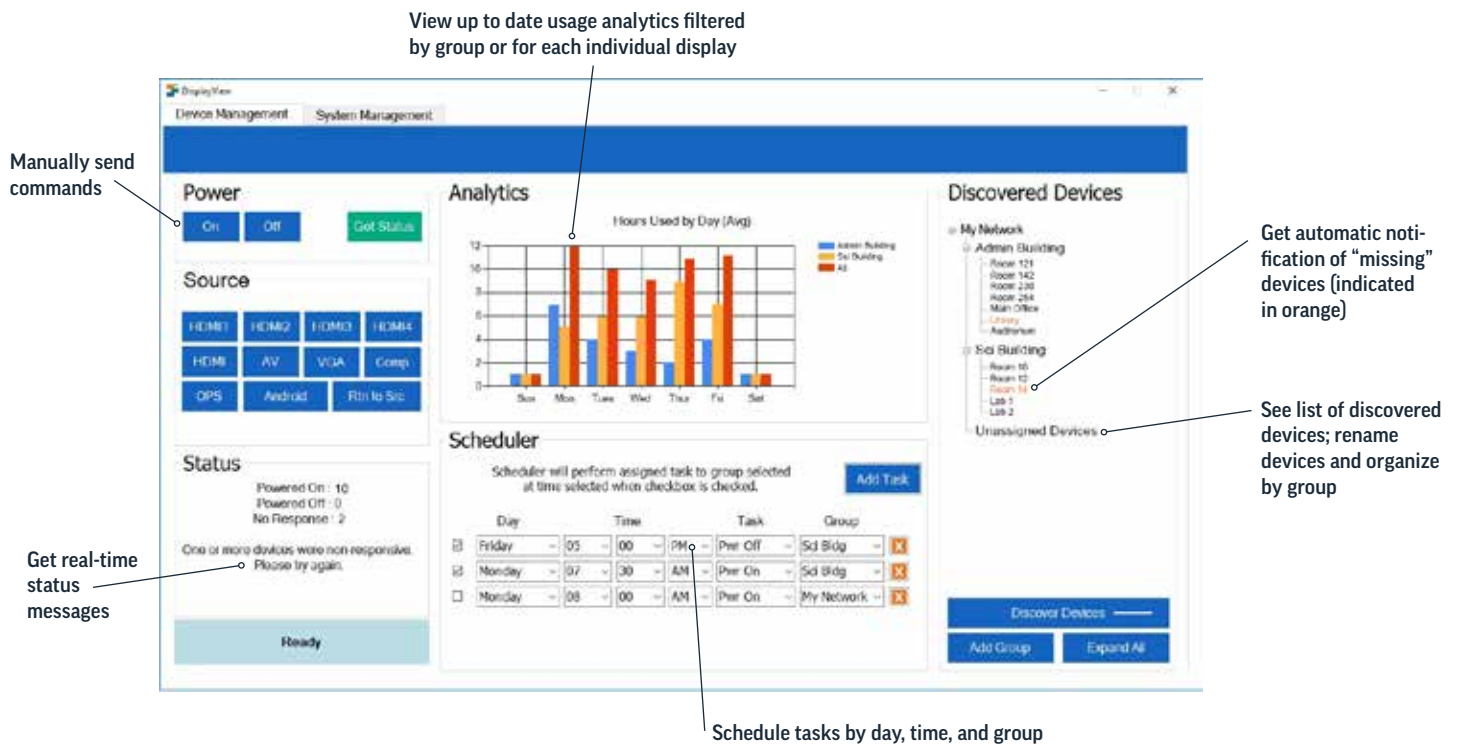

Part #: INDISPLAYVIEW

DisplayView device management software offers a simple and efficient way to monitor and control InFocus panels and projectors across your organization.

With DisplayView, you can detect devices and turn them on, monitor device up-time and usage across your network, and power off all of your devices from one central location. Save money and resources by automating your device management tasks with DisplayView.

Key Features

- Save money by managing power settings and usage from one location
- Auto-discover devices connected to local network
- Organize your devices in groups (each device can be in multiple groups)
- Schedule multiple automated tasks by group
- Receive messages if devices are disconnected from the network
- Devices without network management can be converted using network adapter (INA-TCP232)
- Basic version available as a free download from InFocus.com

Specifications

Hardware Requirements	InFocus display device (projector or touch panel) with LAN port supporting Network Management. Units without Network Management will need a Network-to-RS232 adapter (INA-TCP232) to connect to the RS.232 port.
Software Requirements	Operating System: Windows 7/8/10 with Admin Access
Disk Space	Minimum 100MB
Memory	Minimum 2Ghz
Processor	i5 or better
Network Requirements	Network Interface Card and access to TCP/IP Network, Port Unrestricted (8234)
