

iRover2 for Flat Panels Buying Guide

Flexible, affordable and durable.

Many schools are using flexible classroom setups by rearranging furniture based on the activity and as schools reopen, educators will need flexibility as new routines take shape. Classroom grade levels can change and common areas are used by many grades which means different sized students will be using the same rooms. iRover²® for Interactive Flat Panels offers solutions to accommodate almost any scenario and our carts can move anywhere learning takes place.

Use this guide to compare our iRover2 models to help find the best solution!
