Universal Hand Held Holders & Blades / ProEdge Polyurethane Blades

Our ergonomic **Universal Hand Held Holders** are the ideal accessory for manual solder paste printing applications. Lightweight but rugged, our hand held holders are made from sturdy gold anodized extruded aluminum. Extremely flexible, these holders are capable of holding polyurethane blades and/or metal blades. Holders come standard with a 90 durometer polyurethane blade, but custom durometers are available from 60-80. Flat metal blades are an affordable choice by using the existing polyurethane blade as a backing. Our quick fit metal blades are designed as a convenient sub-assembly with a metal blade riveted between two spacer bars. Metals blades are plated with our proprietary Electrolize coating ensuring superior quality with a guaranteed radius straight edge. Telescoping steel bolts aid in quick blade changes. Holders are available in lengths from 6" up to 18", in 2" inch increments. Custom lengths available.

Our **ProEdge** brand of high performance polyurethane squeegee blades provide exceptional print deposition. Made from the highest grade polyurethane materials, our blades are solvent and abrasion resistant, withstand cracking under repetitive flexing, offer high level impact resistance and have an inherent elastic memory. Unlike molded blades, our precision machined edges are always sharp, resulting in highly accurate printing. Our manufacturing process ensures consistent quality, print reliability and repeatability, dimensional stability and precise thickness control. ProEdge's tight dimensional and durometer tolerances combined with quality assured defect-free edges provide a product you can depend on. Customize It! Our in-house engineering capabilities affords us the unique opportunity to offer a variety of custom options such as durometers, blade edges and dimensions.

SMartTek Adjustable Angle Blade Assemblies / Single Component Squeegees

SMartTek OEM compatible adjustable angle of attack metal squeegee blade holders fit directly into most standard diamond blade holders or single edge blade holders. JNJ's MSI replacement inserts consist of a precision machined aluminum rod with an Electrolyzed coated metal blade embedded in it. Because different squeegee assemblies and stencil printers have different amounts of vertical travel, the MSI blades are available in two heights, 1/2" and 3/4".

LENGTH	HOUSING	METAL BLADE INSERTS	HEIGHT

Single Component Squeegees are finely crafted metal assemblies that are designed to fit single component stencils for printing micro BGAs, ultrafine pitch and difficult devices on populated or bare boards. Made of the same quality materials as our OEM line of squeegees, these easy to handle squeegees come in three standard sizes, 1.5", 2" and 2.5". They may be customized to optimize your printing applications.
