Simplify Your Everyday Use of Devices

"It is hard to find a partner that brings the value of great customer support after the sale and JAR Systems does that."

— *Mike Cicchetti*

Director of Technology Services & Innovation

Client: Volusia County Schools

JAR Systems' solutions help leverage technology to improve learning...

- Increasing quality instruction time with devices
- Providing more efficient processes for tech teams
- Decreasing downtime of devices

WHAT DO OUR CUSTOMERS SAY?

"The quality of their product is top notch, but even more impressive is their customer service. No one provides customer service at the level that JAR Systems does. We are not just a number, we are a valued customer at JAR and they make certain we know that. I would highly recommend JAR Systems to anyone with charging needs."

— *Pam G. Merced College, CA*

"We value your company as one of our partners. Since finding JAR Systems, we have appreciated the products, the sales support, and the minimal technical support ever needed so much that we have not looked at any other competitors products."

— *Tom L. Staunton City Schools, VA*

"The JAR Carts are working extremely well. The design detail of the carts is incredible! I will definitely recommend JAR Carts to other teachers in the archdiocese!"

— *Private School Customer, OR*

"We talked about remotely managing our cart PC's for a long time and it never worked right until we found JAR Carts."

— *Public School Customer, AL*

Why Work with Us?

INNOVATION

At JAR Systems we put a lot of thought into the convenient features of our products such as **pull-out trays** and streamlined **cable management**, which enable easier and faster access to devices. Our network management carts feature secure **sliding doors** that slide back into the frame of the cart to create a smaller working footprint, providing a safe and efficient use of available space.

VALUE

Our broad line of charging solutions accommodates a variety of brands and models of devices to continue to add value through multiple device refreshes. Designed to make deployments simpler, JAR products are easy to use and utilize the powerful **Intelligent Charging System** that keeps devices ready-to-go at a moment's notice. Read more on page 11.

CONSULTATION

From the simplest to the most complex projects, we will work with you to find the solution that will best **achieve your goals** while following the easiest, most cost-effective fulfillment strategy. Our representatives provide personalized support from first contact to delivery and beyond.

QUALITY

JAR products come standard with our **Five-Year Warranty** that covers the entire solution including electrical and the Intelligent Charging System. If you are ever in need of service, simply contact your local reseller or call us at (866)393-4202. We are always here to help!

AT JAR SYSTEMS WE HAVE A SINGULAR FOCUS...

JAR Systems specializes in Intelligent Charging, security, and management solutions for mobile technology. Founded in 2004, the company has spent the last decade focused on providing smarter, more versatile ways to charge and secure ever-evolving technologies. During this time JAR Systems has consulted clients to develop products that support and streamline how mobile technology is used for learning and working. The company's goal is to deliver products that will work efficiently and dependably for many years down the road.

Ultra-Light Intelligent Cart 30

Model # MD-5130-SMART

Ask about options for printers.

JAR SYSTEMS

WWW.JAR-Systems.com | 866.393.4202

MD-5130-SMART

Featuring streamlined cable management and durable steel construction, the popular Ultra-Light Intelligent Cart charges up to 30 devices with an even smaller footprint. This flexible, high-capacity solution is easy to set up and comes with the powerful Intelligent Charging System for faster, more efficient mobile device charging.

More Storage Options for Peripherals

Our Ultra-Light Intelligent Cart 30 features removable dividers to house a variety of brands and types of devices. For classes with fewer than 30 devices, clear shelf space provides more storage options for peripherals. The cart's auxiliary power outlet allows organizations to connect and control power to peripherals alongside their devices.

SECURITY: (1) 3-point lock in front, 2 keys included. Optional wall anchor available.

Lenovo Thinkpad 11" Chromebooks

Charge and Secure Up to 30 Chromebooks, Tablets, or Notebooks

- Intelligent Charging—**NEW FEATURES**
- High Capacity—Up To 30 Devices
- Ultra-Light—Only 84 lbs

NO MORE BROKEN CLIPS OR LOST CABLES!

Cut down on wiring time with a cart that is easy to set up, but endures repeated use.

INDUSTRY-LEADING CHARGING

Never buy another charging system! This cart features the Intelligent Charging System which uses power sensors and charging logic to deliver the fastest possible charge (*more on page 11*).

Adjustable device bays offer space for peripherals

EASY TO TRANSPORT

Weighs in at just 84 lbs—over 100 lbs less than other carts, the Ultra-Light Intelligent Cart secures and transports up to 30 devices with ease. It features top and bottom push bars, a cord wrap, and 5" industrial grade casters for easy maneuverability.

FIVE-YEAR WARRANTY

This cart comes standard with a five-year warranty that covers the entire solution and Intelligent Charging System—a longer than average electrical warranty (*more on page 2*).

Utilize the powerful JAR Intelligent Charging System with a compact, lightweight storage solution that won't break the bank. The Ultra-Light Intelligent Cart is adjustable to support between 30 and 40 Chromebooks, notebooks, tablets or other devices. The cart's cable management scheme allows for a quick and easy set up.

NEW Extended 30 User Cart—Fit Devices Up to 1.3" W

If your organization's device of choice has a large battery that sticks out on the back or they are using bulky cases, the new extended 30 user configuration of the Ultra-Light Intelligent Cart provides that little bit of extra space needed for each device in the same small footprint of the 40 user cart.

INDUSTRY-LEADING CHARGING

Never buy another charging system! This cart features the Intelligent Charging System which uses power sensors and charging logic to deliver the fastest possible charge (*more on page 11*).

SIMPLE, EFFECTIVE CABLE SYSTEM

Cut down on wiring time with a cart that is easy to set up, but endures repeated use. AC adapters are stowed away in a lockable compartment beneath the shelf. The cart supports both in-line and outlet chargers.

Device bays are adjustable to either 1" or 1.3" wide

ADJUSTABLE DEVICE BAYS

Two sets of hole patterns allow the shelves to be interchangeable between up to 30 bays at 1.3" wide and up to 40 bays at 1" wide. Additional dividers may be purchased at any time, or dividers may be removed to offer clear shelf space for peripherals.

EDU Price \$295

JAR SYSTEMS

WWW.JAR-Systems.com | 866.393.4202

Charge and Secure
Up to **16** Chromebooks,
Tablets, or Notebooks

- Cost-Effective: Less Than \$19/Device
- Lightweight and Compact Design
- Flexible: Adjustable Height & Depth

Use as a Wall Unit or a
Desktop Charging Station

WATCH THE VIDEO
www.JAR-Systems.com/CS-1610

How Is the Essential 16 Charging Station Unique?

The Essential Charging Station was designed to address common problems that schools face in trying to implement stationary charging stations, wall units, or charging lockers.

Cost - Other stationary charging options sometimes do not make sense cost-wise for the number of devices that they can accommodate. This solution is more cost-effective than other wall units and charging carts. It even costs less than cases to send the devices home with students.

Versatile Installation - The compact and lightweight modular design of the Essential 16 allows it to be easily mounted to a wall or desk without taking up a lot of space.

Flexibility - The Essential 16 has adjustable configurations to suit a wide range of devices. This versatility makes it adaptable to changing technology plans.

SECURE OPEN DESIGN

The locking system prevents devices from being removed, while providing an open design that allows teachers to see that all devices have been returned with a glance.

PROVEN CABLE MANAGEMENT

Using the same cable management as JAR Ultra-Light Carts, AC adapters and excess cable length are stowed in a lockable compartment beneath the shelf. Cables are accessible from the front of the unit.

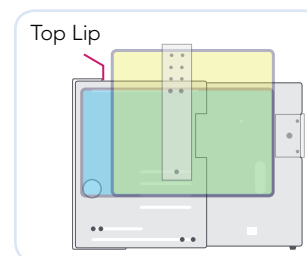

SPEEDY DEPLOYMENT

Multiple charging stations can be used for higher quantities of devices. This can also increase the speed of deployment as students form multiple lines to retrieve their devices.

DEVICE DIMENSIONS

For devices up to 9"H, the maximum depth is 15.5"D. For devices 9-11.75"H, the maximum depth is 13.5"D due to the unit's top lip.

- 8.75"H x 1"W x 15.5"D
- 11.75"H x 1"W x 13.5"D

Simplify Your Everyday Classroom Use of Devices

The unsung hero of modular charging stations. New Flex-Share Charging Stations are designed to easily accommodate a range of class-sizes, device types, and classroom layouts.

Wall or Desk Mounting - Rivaling solutions that cost hundreds of dollars more, the compact and lightweight modular design of the Flex-Share Charging Station means it can be used as a free-standing system, or securely mounted to a wall or desk without taking up a lot of space.

Standalone or Stacking - Integrate modules in multiple areas of a room as standalone units to improve the flow of deployment, or securely stack them to save space.

Stationary or Mobile - The convenient mobility kit makes the unit adaptable to flexible classroom layouts, allowing teachers to easily rearrange its position to suit the lesson plan.

NEW! FLEX-SHARE BUNDLE

Model # CSEM-1615-2U

FOR UP TO 32 DEVICES

The CSE-1615 bundle includes two Flex-Share units, making it possible to charge up to 32 devices at once. This bundle also comes with the mobility kit and stacking kit otherwise sold separately.

PRODUCT UPGRADES

Model # CSE-2STACK-KIT

STACKING KIT

This upgrade provides hardware that allows users to combine multiple Flex-Share units into one without having to compromise on classroom space.

Model # CSE-MOBL-KIT

MOBILITY KIT

An optional mobility kit including four durable 3" casters and a push handle gives users the flexibility to choose between a mobile or stationary solution.

Model # CSE-PDLCK-KIT

LOCKING KIT

This add-on provides the hardware necessary to secure Flex-Share units with individually keyed padlocks. An optional master key is also available.

Intelligent Charging System

Model # PB-80C24

JAR SYSTEMS

WWW.JAR-Systems.com | 866.393.4202

Efficiently Charge
Up to **64** of Any Device

**MAKE YOUR
OLD CARTS WORK!**

**INTEGRATES WITH
NEARLY ANY CART**

The Technology Budget Hero

Faster, More Efficient Charging

The Intelligent Charging System uses power sensors and charging logic to deliver the fastest, most efficient, mobile device charging. It always charges as many devices at once as possible, charging up to a full cart of devices simultaneously. It connects all devices to a single power source and you never have to worry about tripping a circuit breaker. This charging system was **designed to be easily integrated with nearly any cart and can even be used without a cart.**

FEATURES AND SPECIFICATIONS

- Automatically evaluates the power draw to deliver power to as many devices at once as possible, always achieving the fastest charge and eliminating the need for electrical timers and switches.
- Auxiliary power outlet allows you to connect and control power to peripherals.
- Built-in circuit breaker protection prevents overloading of electrical circuits.
- LED charging status indicators display which devices are actively charging and the level of charge.
- LCD display tells you how long it takes to typically charge the devices.
- Power sensors control distribution of power to where it is needed most.
- USB port makes it easy to upgrade software in the future, should device specifications change.
- Comes with a mounting bracket designed to be attached to nearly any surface.
- Intelligently controls the charging of up to 64 devices at once, all to one 12' power cord.
- 2.6"H x 9.62"W x 5"D | 1.85 lbs

EFFICIENCY ON A BUDGET

If you have carts that do not charge your devices well or if you are tired of replacing broken timers every year this system can solve your charging problem and prevent you from having to purchase all new carts, potentially saving thousands of dollars.

INCREASES DEVICE AVAILABILITY

Devices charge automatically when returned to the cart in manage mode, making it simple to use. The LED status indicators tell you how long it takes to charge your devices, so scheduling is easier.

BETTER CHARGING

Long-gone are the days of slowly charging devices with simple timers. The Intelligent Charging System uses power sensors and charging logic to deliver a faster charge than other charging methods. That means no more uncharged devices and less hassle.

NEVER Replace Another Over-Priced Cart Timer!

Save money and technicians' time by utilizing the cost-effective Intelligent Charging System instead. With a standard 5-year warranty and increased functionality, it just makes sense.

Network Management Carts

Model # SB-5900B, SB-5400B

JAR SYSTEMS

WWW.JAR-Systems.com | 866.393.4202

Charge and Secure Up to 30 Notebooks

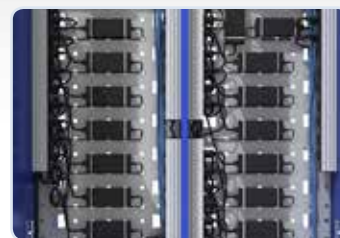

- Intelligent Charging—**NEW FEATURES**
- 30 Pull-Out Trays
- Secure Sliding Doors
- Versatile Design
- Remote Management Compatible

Save Time and Money!

Remote management capabilities free IT staff from routine updates.

Individual Pull-Out Trays

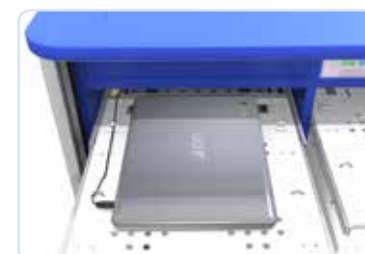

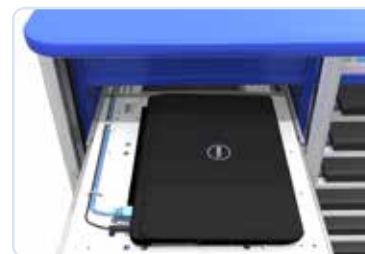

Cable Management in Back of Cart

JAR Network Management Carts have convenient features that will be **appreciated by your techies, teachers, and students alike**. All charging cables are neatly secured to each individual tray, so they are always right where they are needed. AC adapters are locked away in the **separate back compartment**. Secure sliding doors wrap around the side of the cart to offer a smaller footprint. The flexibility of the individual tray design allows the carts to **accommodate a large variety of devices**. This makes them especially handy when it comes time to transition to new devices. With their versatility and sturdy construction, Network Charging Carts will **continue to serve your organization for years to come**.

You don't have to see the future to make a good investment!

A flexible cart can save you money down the road.

Most of the schools that we have worked with through the years have transitioned from one device to another. Whether you are making a one-time purchase or choosing a standard for which devices are purchased as needed over an extended period of time, it's important to note that **hardware is constantly changing**. Devices can change in just the time between when you make the decision to the time you make a purchase, so flexibility is key. **JAR Carts are made to stand the test of time**. They will charge the devices you have now as well as devices that you might have in the future and can even mix and match devices! Read more in our blog post, "Why You Don't Need a Branded Mobile Cart", www.JAR-Systems.com/Blog/Go-Versatile.
