A Unique and Affordable Solution

Cost-Effective

Other stationary charging options sometimes do not make sense cost-wise for the number of devices that they can accommodate. This solution is more cost-effective than other wall units and charging carts. It even costs less than cases to send the devices home with students.

Versatile Installation

The compact and lightweight modular design of the Essential 16 allows it to be easily mounted to a wall or desk without taking up a lot of space. The all-steel construction ensures the durability required for repeated use in classroom environments.

Unrivaled Adjustability

The Essential 16 is adjustable in height and depth to suit a wide range of devices including Chromebooks, tablets, and notebooks. This versatility makes it highly adaptable to evolving technology plans.

SPECIFICATIONS

14"H × 22.68"W × 14"D | 45 lbs
Adjusts to: 17.25"H × 22.68"W × 18"D

5 YEAR WARRANTY

Five-Year Warranty: Standard five-year warranty covers the entire solution.

Secure Open Design

The locking system prevents devices from being removed while providing an open design that allows teachers to see that all devices have been returned at a glance.

Proven Cable Management

Cut down on wiring time with a solution that is easy to set up, but endures repeated use. AC adapters and excess cable lengths are stowed away in a lockable compartment.
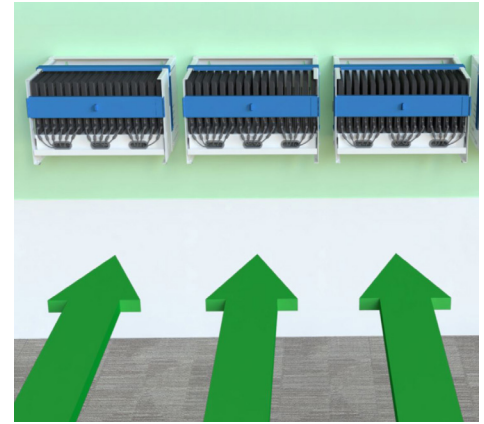

Speedy Deployment

Multiple charging stations can be used for higher quantities of devices. This can also increase the speed of deployment as students may form multiple lines to retrieve their devices.

1:1 Self Check-In Solution With Kensington®

Individual Device Security That Doesn't Cost a Fortune!

Many schools have instances where they wish that kids could **secure and charge** their devices on an individual basis. Individual charging lockers cost thousands of dollars and are not a viable option for most schools. The Essential Charging Station paired with its Kensington lock add-on now provides schools with an affordable alternative.

Use in Strategic Areas Across the Campus:

- *Common Areas*
- *Gymnasiums*
- *Classrooms*

Simple and Effective

Sets of Kensington locks from JAR are the perfect length for use with the Essential 16 Charging Station and can be easily attached to the top locking bar. This simple addition can solve many common problems and even increase productivity. Not only can this prevent wasted time searching for devices that were returned to the wrong place, it also can prevent instances of theft. By giving students a secure location to lock and charge their device, they will be less likely to leave it in an unsecured space.
