

Designed with a blade guard and replaceable straight blade, this insulated cable knife is perfect for cutting around jacketed cables without the risk of accidental cuts and nicks. This cable knife also features the following:

- Insulated handle is rated for use on live equipment up to 1000V and is compliant with DIN EN 60900 VDE 0682-201:2013-04 standards
- Blade guard prevents accidental cuts and nicks while dismantling cable
- Blade guard can be folded into handle for slitting cable jackets
- Ultra-sharp stainless steel blades slice through jackets of cables and can be replaced when worn out
- Ergonomically designed handle for increased comfort and control
- Included tethering hole allows for easy transportation and convenient storage
