

Integration Kits

Power Hub IK

MC8 IK

Product Description

Already have a table, countertop, or surface that you like or that would be much more useful if it allowed people to plug in and charge up their mobile devices? KwikBoost Integration Kits are designed just for that. They can be integrated into just about any surface creating an instant source of power.

The Power Hub features our core charging technology, including 8 charging connectors, as well as two regular power outlets and two USB ports. There is literally nothing you can't power with this kit.

The MC8 features our core charging technology, including 8 charging connectors, and can be mounted on top of, underneath, inside or outside of anything and just about anywhere, providing cables for nearly any device.
