

MPS 1000 PCR Support Plate

The **MPS 1000** Mini Plate Spinner was released earlier this year and the initial reception has been exceptional. In this time we have learned from our customers that there is also a need for a centrifuge to spin down PCR tubes, strips and 4x6 (half size) PCR plates. With this said, Labnet is pleased to introduce the new **PCR Support plate**.

Labnet's PCR Support Plate has been designed with outer dimensions similar to a standard 96 well microplate, allowing for compatibility with most microplate centrifuges; and making it ideal for use in the **MPS 1000 Mini Plate Spinner**, *the only compact and economical centrifuge for plates.*

Supports:

- 8 x 0.2ml PCR Strips
- 12 x 0.2ml PCR Strips
- 0.2ml PCR Tubes
- 4 x 6 (Half Size) PCR Plates

ITEM: C1000-ADAPT
