

mini-Ligno S/D moisture meter

Description:

The mini-Ligno S/D is a pin meter for measuring wood, sheetrock, and other building materials.

Multi-purpose Moisture Meter:

A multi-purpose instrument to check wood and building materials with its own percent scale for sheetrock and wood. Other building materials can be checked with the reference scale. Great when checking for moisture problems in buildings.

Designed for home inspectors, architects, contractors, painters and home owners to measure moisture in wood and soft building materials such as sheetrock, plaster and gypsum. Ideal to pinpoint problem areas. The reference scale for non-wood building materials allows easy identification of excess moisture.

Standard mini-Ligno S/D:

- 1 mini-Ligno S/D
- 1 carrying pouch with belt loop
- 1 wrist strap
- 1 9V battery
- 1 wood group chart
- 1 instruction manual
- 2 pr pins for 3/16" and 7/16" measuring depth
- 2 year warranty (except battery and pins)

Features:

- Bright LED display
- Ergonomic, durable, rugged design for easy operation
- Wide measuring range for wood scale (6-45%)
- Built in corrections for 2 wood groups
- Sheetrock scale (0.0-7.5%)
- Reference Scale (0-99)
- Automatic shut off
- Temperature stable circuitry with built-in calibration check for the meter

Specifications:

Specifications for mini-Ligno S/D:

Size: 5.5"L X 2.75"W X 1"H

Measurement Range: Wood: 6-45%

Gypsum: 0-7.5%

Reference Scale: 0-99

Resolution: 0.1%

Calibrated for a wood temp of 70° F (20° C)
