

Ligno-Scanner SDM moisture meter

Picture File: scanSDM

Description:

The Ligno-Scanner SDM is a pinless moisture meter for wood, bamboo, concrete, and drywall with dual depth measuring capabilities at 1/4" and 3/4".

Wood Moisture Meter:

The Ligno-Scanner SDM dual measuring depth: 1/4" (7mm) and 3/4" (20mm). Great for measuring thin and thick materials. Great for measuring engineered products, where the surface is of a different material than the core. Great for checking surface moisture after coatings, water spills, or cleaning.

Wood: 71 settings for domestic and tropical species (0.3-1.0)

Bamboo: 10 bamboo settings for all bamboo

Concrete: scale 0-100, corresponding with the relative humidity evaporation out of the concrete (RH in-situ probe)

Drywall: Dual measuring depth is helpful when checking moisture in varying thickness'

Other non-wood building material: Reference scale

Standard Ligno-Scanner SDM :

- 1 Ligno-Scanner SDM
- 1 carrying pouch with belt loop
- 1 9V battery
- 1 setting chart
- 1 instruction manual
- 2 year warranty (except battery)

Features:

- Digital Display
- Rugged design for easy operation
- Wide range wood scale (5-60%)
- Reference Scale for non-wood building materials (0-99)
- Concrete scale (0-100)
- Built in corrections for 71 wood groups
- 10 Bamboo settings
- Automatic shut off
- HOLD feature
- 1/4" and 3/4" measuring depth

Specifications:

Specifications for Ligno-Scanner SDM:

Size: 5.5"L X 2"W X 0.5"H

Measurement Range: Wood: 5-60%
Bamboo: 5-40%
Concrete: 0-100

Resolution: 0.1 %
