## 1 Preparation before use

#### Very Important

- Please activate your warranty: <u>http://www.MyLumens.com/reg</u>
- To download the updated software, multilingual manuals, and Quick Start Guide, please visit Lumens<sup>™</sup> web site at: http://www.MyLumens.com/support.php
- To ensure successful installation, please be sure to follow each of the following steps

#### 1.1 Equipment requirements

- VS-LC101 / VS-LC102 x 1
- IP PTZ camera x 1 ~ 3, e.g. VC-A20P x 3
- Computer (or Laptop) x 1
- Router x 1, Giga router recommended
- Display x 1
- Network cables x 3 ~ 5
- HDMI or VGA cable x 2
- External hard drive: USB or eSATA external hard drive x 1 (VS-LC102 has a built-in hard drive, and thus it is optional)
- Amplifier x 1
- Audio mixer x 1
- Speaker set x 1
- Mic x 1

[Remark] The number of connected devices can be increased or adjusted based on environment requirements.

205 Westwood Ave, Long Branch, NJ 07740 Phone: 866-94 BOARDS (26273) / (732)-222-1511 Fax: (732)-222-7088 | E-mail: sales@touchboards.com

## <u>Lumens T</u>

## 2 How to connect

• Please follow the following instruction to complete the connection.

NO.	Function	How to connect
1.	Power	Connect the power cord
2.	Image input	Connect the computer HDMI to the HDMI IN 1 Note: Replace the image input device from the computer to other devices
-	1	as needed, e.g. projector.
3.	Image output	Note: If the TV does not provide HDMI, use an adapter instead according to the TV specification
4.	Audio input	Connect Line devices for audio input, e.g. amplifier, audio mixer
5.	Audio output	Connect Line devices for audio output, e.g. amplifier
6.	Storage Device	Insert USB or eSATA external hard drive as the storage device
7.	WAN	Connect the WAN port to the router to link with the computer in order
		to conduct remote management of VS-LC101 / VS-LC102
		<b>Note:</b> Please first connect the computer to a LAN port (8), and then connect the computer to a router after completion of the external network setting
8.	Networking	Connect webcam (e.g. VC-A20P) for image input
	ports (LAN)	Directly connect to the computer for online management operations. For the initial use, connect to this port for following operations

3 Instruction for installation and setting

## 3.1 Confirm and set the VC-A20P network configuration

- Use a C-Video cable or a DVI cable to connect VC-A20P and the monitor (refer to the figure below for the connection method)
- After the power is switched on, press the [MENU] button on the VC-A20P remote to open the OSD menu.
- Move down to [Ethernet]; press [ -] to enter
- Press [ ←] to enter the [DHCP] setting; confirm [DHCP] to be in [Close] state.
- Press [MENU] ( to exit the [DHCP] setting
- Confirm the [IP Address] is the preset [192.168.100.150]
- [Remark] If there are more than one VC-A20P to be connected, please modify the IP address to [192.168.100.x] , e.g. [192.168.100.151], [192.168.100.152]...etc.
- After complete the confirmation of the address and modification, repeat pressing the [MENU] (a) button to exit OSD menu.

**[Remark]** For VC-A20P relevant use and operation method, please visit Lumens website; download and read the <u>VC-A20P operation manual</u>.

Before begin the following settings, please confirm that the connection has been completed according to <u>2 instruction of connection</u>.

### 3.2 Confirm the VS-LC101/ VS-LC102 IP Address

- Press the
   button on the VS-LC101/VS-LC102 remote control; open OSD menu
- Move rightward to [Setting]; press [OK]; and enter the setting page.
- Move downward to [About]; press [OK]; and enter the setting page to confirm the IP address.
- Repeat pressing the
   button to exit OSD menu

# **Lumens**"

#### 3.3 Connect to the VS-LC101/ VS-LC102 Webpage (including log in) [Remark 1] For the computer that remotely controls VS-LC101, the network interface card needs to be set to obtain the IP address automatically.

- Use the computer being connected to LAN, and open a web browser
- Enter the VS-LC101 / VS-LC102 IP address, http://192.168.1.150 (default)
- [Remark 2] Firefox or Safari(MAC) browser recommended
- Select [System Configuration]

 Input the VS-LC101/ VS-LC102 Admin account and password. User: admin
 Password: admin

Lumens		☆  Larguage
	System Configuration	

• Click [Log in] to log in

#### 3.4 Settings

3.4.1 Confirm the time setting.

CaptureVis	ion Station	Language   Log out System Administration
System Information	Device Setting	
Source Setting	Host Name : Lumens-VS-LC101	
Source Security	IP Address : 192.168.0.192	
Network Setting	Time Zone : (GMT+08:00) Taipei, Be 🗸 🗌 Summer tir	ne
Record Setting	Current Time : 2015/01/20 11:46:54	
Loopl Storage Setting	O Manually	
Local Storage Setting	NTP Service time.nist.gov	
Layout Manager	System Administration Online I	Director

- Confirm the time to be correct. If time modification is required, use the manual setting or select other NTP servers.
- 3.4.2 Change the network setting

The following setting is related to the way of using DHCP. Please confirm the external network setting for WAN connection before starting the setup.

Confirm DHCP or the specified address is used. Set according to the correct network connection.

CaptureVis	Language   Log out System Configuration		
System Information	-Network Setting		
Source Setting	DHCP     Manual Configura	ition	
Network Setting	IP Address :	192.168.7.40	
Record Setting	Mask :	255.255.255.0	
Local Storage Setting	Default Gateway :	192.168.7.254	
Lotal Dichago Coulling	Primary DNS :	192.168.1.211	
Layout Manager	Secondary DNS :	192.168.1.212	
Lecture Manager			Apply

- Open the [Network Setting] page
- Select [DHCP]
- Click [Apply] to apply the setting

Reconnect after confirming the VS-LC101 / VS-LC102 IP address according to <u>3.2</u>
 [Remark] Upon completion of the setting, the computer can be connected remotely via the LAN

#### 3.4.3 Format a hard drive

[Remark] As for the SATA hard drive, the formatting step can be omitted. • Open the [Local Storage Setting] page,

CaptureVi	CaptureVision Station					
System Information	Storage I	Device				
Source Setting	Status Unplugged	Interface eSATA	Disk Name	Capacity	Free Space	Manufacturer
Network Setting	Unmounted	USB	TransMemory	28.63 GB	27.00 GB	тозніва

Layout Manager	Cycling Record					
Lecture Manager		Disk Sele	oct : USB1			<b>(4)</b>
Photo Manager						Apply

# Lumens

Select a hard drive. For the initial use, please format the hard drive \_\_\_\_\_ first. It

takes few minutes to format the hard drive and the duration varies according to different storage device formats. Before the formatting is completed, please do not close the webpage. Until the "Formatting..." message is closed, the formatting is completed.

- Check [Enable Local Storage] to load the hard drive.
- If recycling the use of hard drive storage space is required, check [Cycling Record]. Then, when the hard drive space is completely used, the old data will be overwritten by the new data in order to continue storing.
- "Select a hard drive according to the storage device".
- Press [Apply] to apply the setting.
- The state of the storage device will change to [Mounted] and the storage device setting is completed.

#### 3.4.6 Audio In

- Audio Volume
- Select sound output according to the output device ([Remark] HDMI output is preferred)
- Press [Apply] to apply the setting.

[Remark] When Line In is connected to a microphone, please click is to change to microphone input.

#### 3.4.7 Screen and video programming

- Open the [Layout Manager] page
- Set [Display layout] style. There are totally 9 sets of style available for setting.
- Set [Record layout] style. There are totally 9 sets of style available for setting.

After the above setting is completed, please log out from the webpage.

#### 3.5 Confirm the setting is normal.

- 3.5.1 Confirm the setting of the screen split style.
  - Confirm whether there are images on CH1  $\sim$  4. If the image is different from the setting, please refer to 3.4.5 Setup the image input to reset the setting.
  - Use the remote control; press the 🔄 button; confirm whether the 9 video split styles are the same as the plan. Blue color represents the current style applied.
  - Use the remote control; press the  $\square$  button; confirm whether the 9 screen split styles are the same as the plan. Blue color represents the current style applied.
- 3.5.2 Confirm that the screen capture function is normal.
  - Use the remote control; test the screen capture function. If failed, please refer to **3.4.3 Format a hard drive** to confirm whether the hard drive is installed correctly.
  - Use the remote control and press the 🖸 button to capture screen images.
- 3.5.3 Confirm that the recording function is normal

Use the remote control; test the recording function. If failed, please refer to <u>3.4.3</u> Format a hard drive to confirm whether the hard drive is installed correctly.

Use the remote control and press the 
 button to begin recording; press the
 button to stop recording.

3.5.4 Confirm that the playback function is normal

Use the playback function to confirm the photograph and video results.

- Use the remote control; press the D button to open the OSD menu.
- Select [Playback] -> [Local Storage]
- [Photo] -> Select the folder by date -> choose photo
- Press 📥 to exit the photo browser.
- [Video] -> Select the folder by date -> Select the video and begin to play.
- Press rightarrow to exit the video play

[Remark] When use the playback function for the first time, a message [Storage device mounting...] will appear, indicating LC101 supports the format of storage device being mounted normally.

If the above function can be performed normally, then the installation is completed. The user can begin the operation remotely via the Internet connection

Use of the operational functions or detailed descriptions of various settings and functions of VS-LC101, please refer to Lumens website; download and read the <u>VS-LC101 User</u> <u>Manual</u>.
