- Insert the code as set by user then press  button to open

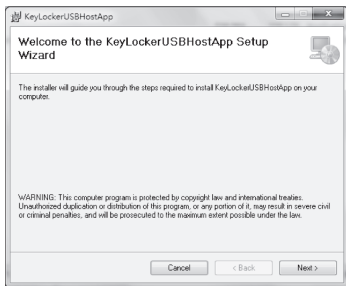

4. Administration Software

4-1. For Windows OS Users Software Installation Guide

Double click “KeyLockerUSBHostApp” to start the software installation

Press “Next” after the Setup Wizard pops up

Choose the target drive/folder to place software then press “Next” to proceed

Press “Install” to start the software installation, then Setup Wizard will show the processing status of installation.

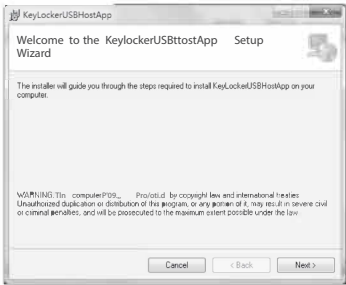

After installation is complete, press “Finish” to close the pop-up window

Administration User Guide (For Windows OS only)

Before you start to use this administration platform, please make sure your "KeylockerUSBHostApp" has been successfully installed on your laptop or refer to "Software Installation Guide" and "KeylockerUSBHostApp" we have provided.

Use a Micro USB cable to connect your computer to the charging locker. The Micro USB port on the charging locker is placed at left bottom corner next to the keypad.

Doubleclick the shortcut of "KeylockerUSBHostApp" on windows desktop. Software will run automatically.

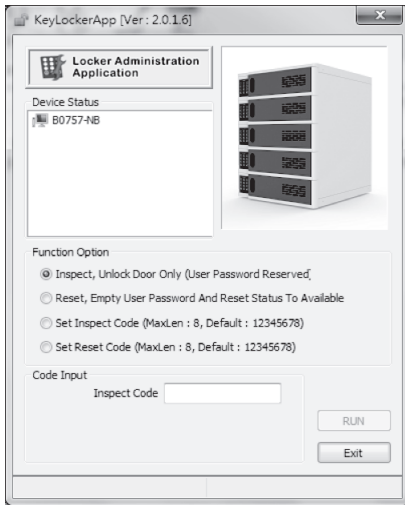

After software opens, you will see the administration platform on the right.

Administrator Guidance

Unlock by Administrator

Unlock the door without user's personal code

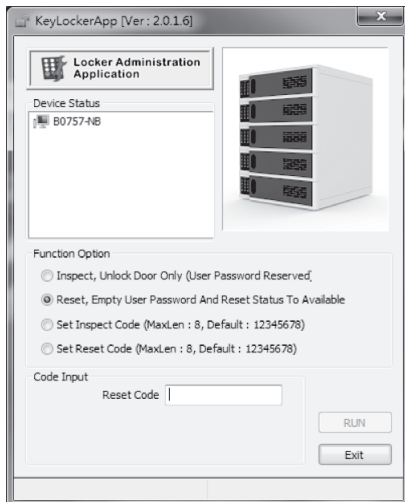

Select 1st option (Inspect, Unlock Door Only (User Password Reserved)) » Insert "Inspect Code" » Press "RUN" to proceed. Door will open after "Successful" message pop up.

Tip: Default Inspect Code is 12345678

Unlock & Reset by Administrator

Allows you to open the locker and delete/reset the code that was set by the user to default.

Select 2nd option (Reset, Empty User Password And Reset Status To Available) » Insert "Reset Code" » Press "RUN" to proceed.

Door will open after "Successful" message pops up, user's personal code will be deleted and the device will be reset to the default settings. (Doors will open by pressing unlock button in default setting)

Tip: Default Reset Code is 12345678

Inspect Code Set Up by Administrator

Setting your own Inspect Code

Select 3rd option (Set InspectCode (MaxLen : 8, Default: 12345678)) » Insert "Current Inspect Code" » Insert "New InspectCode" and "Confirm InspectCode" ,, Press "RUN" to proceed.

"Successful!" message will pop up after the code has been configured successfully. Notice! You may not set more than 8 digits for the code.

Tip: Default Inspect Code is 12345678

Reset Code Set Up by Administrator

Setting your own Reset Code

Select 4th option (Set Reset Code (MaxLen : 8, Default: 12345678)) » Insert "Current Reset Code" ,, Insert "New Reset Code" and "Confirm Reset Code" » Press "RUN" to proceed.

"Successful!" message will pop up after the code has been configured successfully. Notice! You may not set more than 8 digits for the code.

Tip: Default Inspect Code is 12345678. It's an important code to reset code back to default setting (refer to 2nd function option); suggest administrator to take a note to avoid a missing code.

4-2. For Mac OS User Application Installation Guide

LockerAdmin

Before you start to use the Administration App (Application) and to work with your locker, you will need to install the App on your Mac.

How to Install App

1. Open your Finder and go to the location where you saved the App file we have provided.

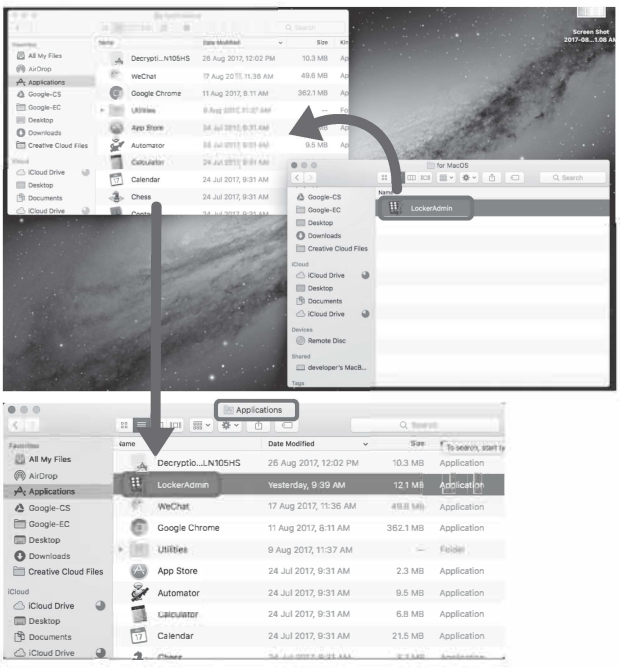

Tips: The file is named as (LockerAdmin).

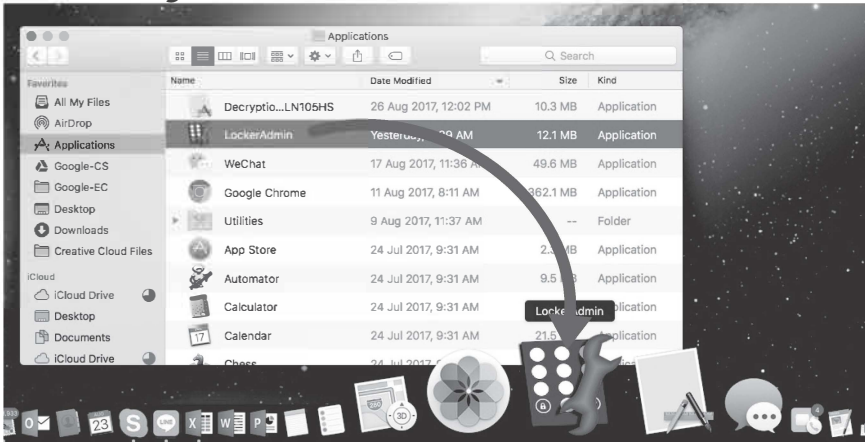

2. Open another New Finder Window (right click on Finder icon) then go to Application Window.

3. After you have opened the above two Finder Windows, copy "LockerAdmin" then paste it anywhere inside the "Application Window".

4. Dropping “ LockerAdmin” into Dock as a shortcut to open the application.

Your administration application has been installed successfully into your Mac. You are now able to manage each compartment of your locker.

How To use the App

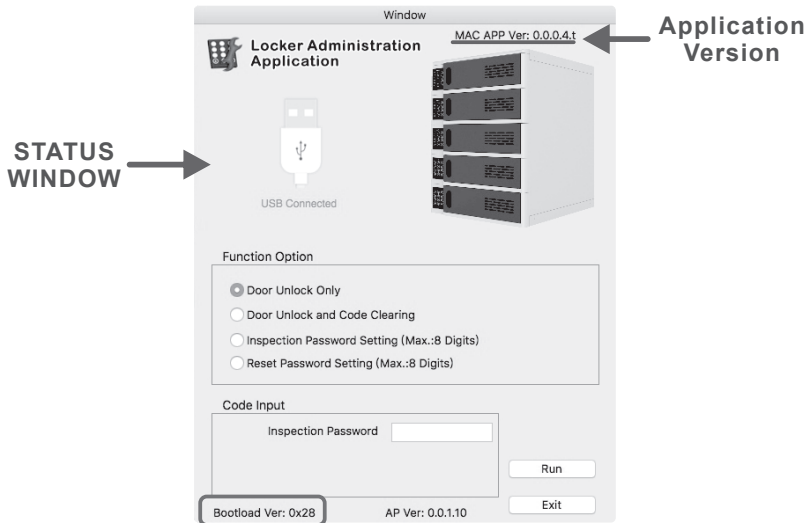

LockerAdmin

We suggest the App be treated as a confidential program and never be disclosed to any third party or end-user. It will be more convenient for the administrator to manage lockers by using this specific App.

IMPORTANT!

Please always remember to OPEN LockerAdmin before you connect your Mac to target compartment.

- Figure 1 -

Administration Window will pop up after you OPEN LockerAdmin from Dock, then connect your Mac to the target compartment. App will detect the connection status and indicate the USB connection status in the status window automatically. Meanwhile, you need to check and ensure the "Bootload Ver.: XXXX" has been detected and shown on the bottom left of the window. (See figure 1)

NOTICE! App is unable to run if "Bootload Ver." is undetected. Please confirm you are using correct USB Cable (not only for power but also for data) and is connected properly. Or try to reconnect the USB Cable.

Function Options

Door Unlock Only

Allows administrator to unlock and open each compartment without user's own code.

Door Unlock and Code Clearing

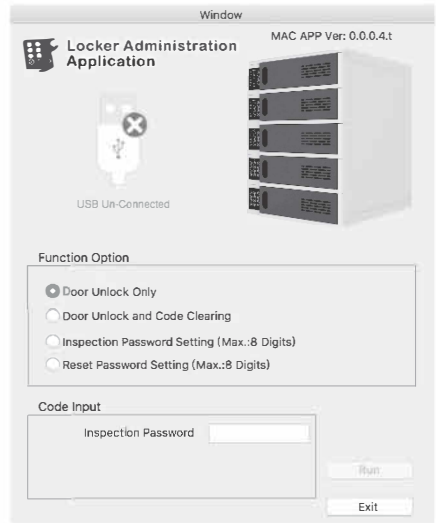

This function is usually in use when users forget the personal code they had set. This function allows administrator to unlock the door and clear the code which was set by the user.

Inspection Password Setting (Max.: 8 Digits)

Inspection Password is mainly used for Door Unlock Only function and starts with the default password setting before you change it. Administrators are allowed to set their own Inspection Password, but if the password is forgotten, you will need to reset all your passwords back to the default setting. (See what to do if you forget INSPECTION/RESET Password)

Reset Password Setting (Max.: 8 Digits)

Reset Password is mainly used for Door Unlock and Code Clearing functions and starts with the default password setting before you change it. Administrators are allowed to set their own Reset Password, but if the password is forgotten, you will need to reset all your passwords back to the default setting. (See what to do if you forgot INSPECTION/RESET Password)

- Door Unlock Only
- (See figure 2)

Select Door Unlock Only from Function Option. Insert Inspection Password then press RUN to proceed with this function.

Tips: Default Inspection Password: 12345678

- Door Unlock & Code Clearing
- (See figure 3)

Select Door Unlock and Code Clearing from Function Option. Insert Reset Password then press RUN to proceed with this function.

Tips: Default Reset Password: 12345678

- INSPECTION Password Setting
- (Max.: 8 Digits)(See figure 4)

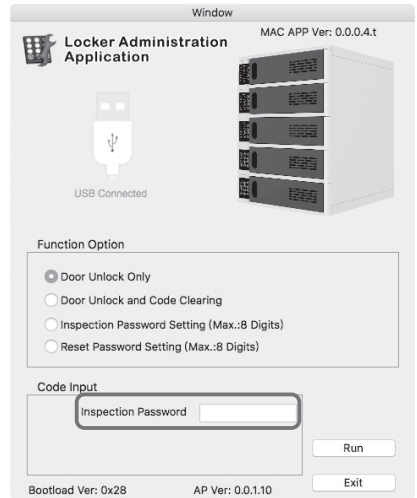

Select Inspection Password Setting (Max.: 8 Digits) from Function Option, Insert Current Inspection Password (start with default), New Inspection Password and Confirm Inspection Password then press RUN to proceed with the change.

Tips: For strict security concerns, we recommend administrators to set their own Inspection Password prior to users using the locker.

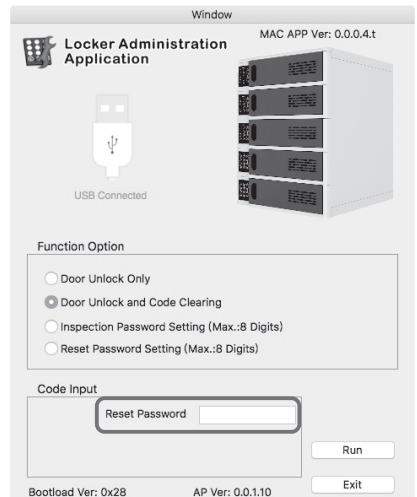

- Reset Password Setting
- (Max.: 8 Digits)(See figure 5)

Select Reset Password Setting (Max.: 8 Digits) from Function Option. Insert Current Reset Password (start with default), New Reset Password and Confirm Reset Password then press RUN to proceed with the change.

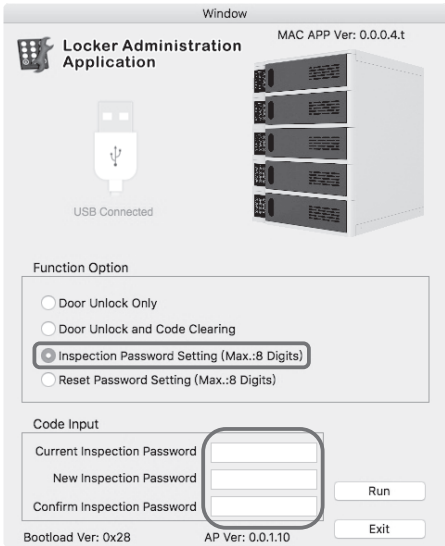

Tips: For strict security concerns, we recommend administrators to set their own Reset Password prior to users using the locker.

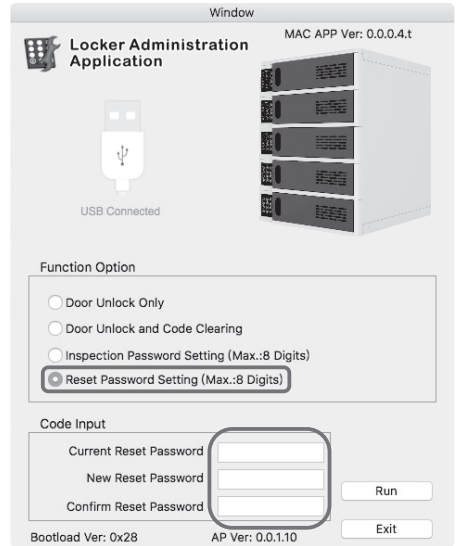

- Figure 2 -

- Figure 3 -

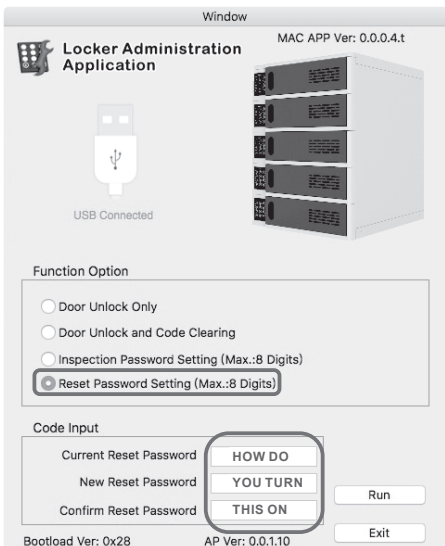

- Figure 4 -

- Figure 5 -

What to do if you forgot INSPECTION/RESET Password

If you forgot the password you have set, follow the below steps to reset your password back to factory settings.

- Figure 6 -

- Figure 7 -

1. Select Reset Password Setting (Max.: 8 Digits).
2. Insert HOW DO into Current Reset Password Column.
(HOW DO must be in ALL CAPS)
3. Insert YOU TURN into New Reset Password Column.
(YOU TURN must be in ALL CAPS)
4. Insert THIS ON into Confirm Reset Password Column.
(THIS ON must be in ALL CAPS)
5. Press RUN to continue the process. (See figure 6)
6. A set of MAC Addresses will be generated after you press RUN,
please provide these to your vendor contact person. (See figure 7)
7. The vendor will provide three sets of passwords, and you will need to
insert them separately into Current Reset Password, New Reset Password,
and Confirm Reset Password.
8. Press Factory Reset to complete the procedure.
(All passwords will be reset to the default setting, including Inspection Password)

NOTICE!

1. This process will erase all the passwords and set them back to factory settings.
2. Ensure the passwords are inserted correctly.
3. Initiate the process within one day after your vendor has provided the three sets
of passwords.
