

Protection against EMI/RFI

MG Chemicals AR series are acrylic-based conductive paints that are designed for protection against EMI/RFI across a broad frequency spectrum. These easy-to-use 1-part coatings cure quickly and are intended for use on commonly used plastics for PCB enclosures like ABS, Nylon and Polycarbonate.

Features & Benefits

- 1-part systems, easy to apply
- 5 options available depending on conductivity requirements
- Strong corrosion resistance
- Excellent adhesion to most plastics
- Does not contain toluene, xylene, or MEK
- Broad frequency range protection

Applications

- Shielding plastic PCB enclosures
- Board-level shielding
- Conductive coating for electro-plating
- Shielding long-range communication devices and satellites

- 838AR** • Carbon conductive paint for low frequency shielding and electrical grounding
- 841AR** • Nickel conductive paint for broad spectrum shielding
- 842AR** • Silver conductive paint for premium EMI vprotection
- 842ARL** • Silver conductive paint with low film thickness
- 843AR** • Silver-coated copper conductive paint which balances cost and EMI performance
