

# ACT-24R 2.4 GHz Tour Guide Receiver

## Key Features

- Industry's most compact and smallest housing. Featuring a lightweight and rugged plastic case to meet professional requirements.
- Stable digital FSK modulation circuitry. All frequencies are located in this band.
- Employ Frequency Hopping Spread Spectrum technology, and each channel presets 4 hopping frequencies that skip the Wi-Fi frequency in use.
- The adaptive tracking algorithm helps effectively avoid interference from 2.4GHz communication products.
- Dual tuner true diversity receiving technology eliminates signal dropout.
- Backlit graphic LCD screen display various function settings.
- The included battery of the rechargeable handheld and bodypack transmitters can be easily removed or interchanged for charging.
- An affordable price for consumers. Ideal for guided tours, camcorders and wireless application of the sound systems.
