- **Sterile comes Standard** by electron beam radiation
- **Self-Standing bag** with gusseted bottom
- **Stop-Pops™ Supplied** 10 Stop-Pop cap locks in every bag

Also available in these great colors!

MTC Bio's **SureSeal S™** microcentrifuge tubes are designed for a broad range of research applications, including enzyme digests, DNA isolation/purification, centrifugation, incubation and general sample/reagent storage. With a variety of design advances, **SureSeal Tubes** improve sample visualization, safety, stability and overall ease of use.

SureSeal S tubes are manufactured under clean room conditions, using only **BioClear™** co-polymer, an advanced polypropylene that maximizes clarity. **BioClear** has been formulated to be crystal clear, without compromising centrifugal strength (tested up to 28,000xg) or the usable temperature range (-90°C to +121°C).

The oversized tube cap (with frosted marking surface), combined with the unique ring & groove closure, enhances the security of the liquid-tight seal, while minimizing the required locking forces for a more ergonomic opening/closing of the tube caps.

All **SureSeal S** tubes are RNase, DNase and pyrogen free.
