AVerTV HD DVR

Video Capture in HD, Digital Video recorder for your PC!

Capture Analog and Digital Content

The AVerTV HD DVR - is a High Definition / Analog video capture card. It's equipped with HDMI input and through the included Dongle Cable, users will have Component, S-Video and Composite Video input interfaces as well. This Allows users to connect to their Cable / Satellite Set-Top-Box, Gaming Console and HD Video recorders to capture High Definition and Analog video content on their PC.

The package includes our AVer MediaCenter software application with advanced software encoding algorithm engine and built-in schedule recording features. Users can capture HD video up to 1080i, and save it in MPEG-2 or H.264 file format (which can be used to playback on your iPod or PSP gaming device) as well as program start and end times of TV shows from your HD Cable / Satellite Set-Top-Box.

Store Your Memories Digitally

AVerTV HD DVR is a superior device to digitalize piles of videotapes turning your content recorded in analog video into DVD format! You can easily connect your desktop computer with your home video devices in just one step - "plug and play"!

Your Personal Multimedia Control Center

AVer MediaCenter

Enjoy Multimedia Entertainment from the Comfort of your Sofa
AVer MediaCenter takes PCTV software to a new level and offers a user-friendly 10-foot UI adapting to your Digital home lifestyle.

USA and Canada only: Order optional AVerMedia MCS remote control (SKU # MPMCSRCKW) from AVerMedia e-Store at: www.avermedia-usa.com/AVerTV/estore/estore.html

TV An easier way to capture Digital and Analog content from a variety of AV sources such as Set-top-boxes, Gaming Consoles, Camcorders and VCR's.

Music AVer MediaCenter offers an intuitive way to listen to your music from files and folders by date, name, or format. Easily access your personal digital music library, play it as background music while viewing slideshow photos or using other functions on your computer.

Video It offers an intuitive way to view your video files and folders by date or by name, providing an interactive video playback experience.

Pictures Users can capture images from any source, including analog TV, digital broadcast, camcorder or VCRs. Consecutive snapshots or photos can then be viewed as a slideshow with background music and stylish effects.

Support real-time H.264 recording and playback on your iPod
Real-time H.264 recording and playing provides higher compression rate and high video quality for saving more than 4X hard disk space comparing with MPEG-2 format. Moreover, it can support up to 320 x 240 iPod video format recording, allowing you to enjoy your favorite shows on your iPod.

Easily customize your viewing experience

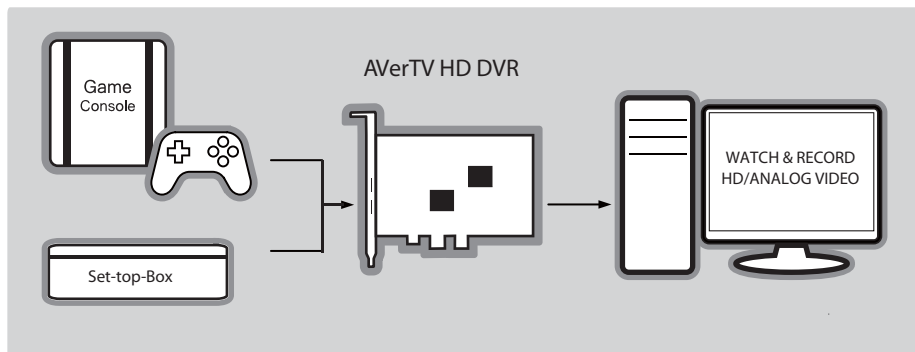

- PIP / PBP Setting allows the viewing of multiple channels simultaneously
- Single / Sequential Snapshot
- Customized Color Adjustments
- Media Files Management
- Complete Channels Scan Capability
- Smart Power Saving Management
- Record TV Programs in MPEG-1/2/4* Format

Note:

AVerTV HD DVR is designed not to capture, convert or transmit video or audio from any Copyright Protected sources or devices (HDCP devices & Macro Vision protected content).

Note:

When recording HD Game play, depending on system configuration, video will have slight lag time and delayed display.

AVerMedia's Quality Commitment

AVerMedia's products are not only compliant with RoHS/WEEE Directives, but we conduct EMI and safety countermeasures to ensure consumers' health and environment protection. All products are available with lead-free finishes and are flame retardant.
