

## Chapter 7: Safety

Chapter 7 of the textbook is a great resource for information on safety and emergency preparedness. It is highly suggested for all students to read this chapter.

The following are the major points of the chapter (Chapter 7):

1. The first step in the safety process is to identify the hazards and risks associated with the activity.

2. The next step is to develop a safety plan that includes the following: a. A list of the hazards and risks associated with the activity. b. A list of the control measures that will be used to reduce the risks. c. A list of the emergency procedures that will be followed in the event of an emergency.

3. The final step is to implement the safety plan and to monitor the situation throughout the activity.

4. It is important to remember that safety is a continuous process and that it is essential to review the safety plan regularly and to update it as needed.

5. The following are some additional safety tips: a. Always wear your seat belt when driving. b. Always use proper lifting techniques. c. Always use caution when working with tools and equipment. d. Always use caution when working with chemicals and hazardous materials.
