

FPT-H1 180° Peel Fixture Kit

Description

The Mecmesin FPT-H1 horizontal coefficient of friction tester can also be used for specific standard peel test methods. Optional fixtures enable 90°, 180° and T-peel testing, which are especially suitable for pressure sensitive adhesive tapes and labels.

The 180° fixture features a raised bed to ensure accurate alignment with the draw hook. The bed itself accepts float glass and stainless steel sample plates, to comply with the requirements of a range of standard test methods, including Afera 5001, ASTM D3330, BS EN 1939, FINAT FTM1 and PSTC 101.

Specification

Part no.	Length	Width	Height	Max. sample width
432-636	173 mm	90 mm	26 mm	50 mm
Part no.	Material			
432-651	Float glass			
432-652	Stainless steel			

Dimensions mm
