

PV testing in the palm of your hand

IMT100

PV is growing worldwide on a daily basis. To ensure that solar panels withstand the elements over time, electricians need a tester that delivers accurate results, quickly and easily.

The IMT100 handheld tester is perfect for testing PV systems for continuity measurements, low resistance bonding, open circuit voltage, polarity voltage, blocking diode testing, and diagnostic insulation resistance testing. The IMT100 is ideal for use in any environment, and the accuracy and precision of the test results are second to none.
