Job _____

Linen Trucks

CLT Series

- **Versatile Construction:** By positioning the two folding shelves on the CLT – either horizontally or vertically – three different truck configurations become possible:

- 1) Folding shelves can be positioned horizontally for easy transport and accessibility for fresh linen.(35-40-bed capacity)
- 2) Folding shelves can be positioned vertically to become an enclosure panel,creating a spacious rolling bin for the collection and the transportation of soiled linen.
- 3) Upper folding shelf can be positioned horizontally and the lower shelf positioned vertically creating traditional storage above bin storage.

Note: Clean and dirty linen should not be stored on the same cart at the same times.

- **Open Wire Features:** Minimize dust accumulation and allow a free circulation of air, greater visibility of stored items, and greater light penetration.
- **Brake Lock/Swivel Lock Combination Casters:** Enable a single pair of casters to serve as swivel, rigid or brake casters to meet varying operational needs. See sheet #11.70.
- **Covers Available:** Catalog numbers on reverse side. See sheet #11.80.
- **Pitched Aluminum Dust Cover:** Shields lower truck contents against dust or dirt.

Heavy-Duty

Heavy-duty models contain a heavier-duty bottom shelf and two additional intermediate frames.

Standard-Duty
