STARSYS™ CATHETER STORAGE SYSTEM

Designed for environments where aesthetics are important and cleanliness is essential, Starsys™ is a highly organized system that meets the demands for storage, transport and productivity centers. This modular system provides solutions that can be easily reconfigured to meet the rapid and constant change in today's healthcare environment. Catheter storage is a prime example of how Starsys can be configured to meet a specific application.

The Starsys catheter storage module is a high-density storage solution, which provides quick access and retrieval, visual inventory and easy identification.

- **Accessible —** Each slide on the catheter module offers full extension, which brings the catheters into full view allowing quick access and visual inventory of remaining stock.

- **High Density —** Each module can accommodate up to 5 slides. The maximum capacity for a slide is 120 catheters. Maximum capacity for a module is 360 catheters. The standard configuration is one shelf, 3 slides, 30 labels and 15 hooks (180 catheters).

- **Adjustable —** The catheter module is removable without tools and can be adjusted vertically on $1^1/_2$" (38mm) increments.

- **Flexible Configurations —** The catheter module may be positioned in the top of a cabinet for maximum storage length. You may put multiple catheter modules in a single bay for the storage of shorter catheters, or you may combine with drawers. A cabinet can be designed with a configuration to fit your needs without extending the lead-time.

- **Versatile —** The catheter module may also be used as a general storage level when storage is required above catheters.

*MICROBAN® antimicrobial product protection helps keep surfaces "cleaner between cleanings" by inhibiting the growth of mold, mildew, fungus, and bacteria that cause odors and stains on the shelf surface.

MICROBAN® and the MICROBAN® symbol are registered trademarks of the Microban Products Company, Huntersville, NC.

Metro incorporates several elements in its product design to support a facility's cleaning protocols:
- Microban® antimicrobial protection helps prevent the growth of stain and odor causing bacteria on the product.
- Advanced polymer and other proprietary finishes provide corrosion resistance
- Smooth rounded corners to allow for easier cleaning

Look for the "red check" symbol for this added protection.

Starsys Catheter Storage

SXRCATH*

The SXRCATH catheter module is an accessory for a stationary or mobile Starsys unit configured with corrugated polymer inner panels.

- Consists of 1 shelf, 3 slides, 30 labels and 15 hooks
- Shelf is predrilled to accommodate up to 5 slides
- Shelf locks into place so it does not pull out as slide is extended
- Removable without tools
- Adjustable vertically on $1^1/_2$" (38mm) increments

Some assembly required

- Dual role:
  — Storage of hanging catheters below
  — Also serves as a shelf for supplies
- Shelf is epoxy-coated steel
- Weight Capacity: 75 lbs. (34kg) (Includes weight of slides, catheters and supplies)
- Dimensions: $6^3/_8$"H x $17^7/_8$"W x 21"D (162 x 454 x 533mm)
- Shipping Weight: 29 lbs. (13.2 kg)

SXRCATHSLD

The SXRCATHSLD is a full extension catheter slide that works in conjunction with the catheter shelf assembly. Up to two additional SXRCATHSLD can be added to the SXRCATH.

- Consists of 1 slide, 10 labels and 5 hooks
- Installs onto SXCATH easily with the turn of a screw
- Built-in stop keeps slide from extending when closed
- Can hold up to total of 10 hooks
- Hooks can be oriented in one of three ways: Left, Right or Straight Forward
- Pull handle also serves as label holder
- Label Size: $2^1/_2$"W x $3^7/_8$"H (64 x 98mm)
- Weight Capacity (per slide): 25 lbs. (11kg)
- Slide Extension: 20" (508mm)
- Shipping Weight: $7^1/_4$ lbs. (3.3 kg)

The catheter hook can be installed on the slide without tools. The hook can be rotated on 90 degree intervals so the catheters can hang off to the left of the slide, to right of the slide or directly below the slide. Maximum storage capacity can be attained with three slides (10 hooks per slide) when the hooks alternate left to right from slot to slot.

• Consists of 1 bag of 5 hooks
• Capacity: Up to 12 catheters
• Maximum Weight Capacity (per hook): 5 lbs. (2kg)
