**I**ntroducing the Spectrum eVolve Multi-Tech Cart™. Neatly organize different mobile devices in one cart, and ensure each device is charged and ready for when your students need to use them. eVolve Carts are large-scale multi device charging stations ready to take on the needs of a high tech classroom.

Curriculum can be expanded in a “best practices” application (match best device for chosen curriculum). Use the eVolve Multi-Tech Cart to get the most out of your classroom content and the most out of your students!

The eVolve is a modular system with each module set up to specifically support laptops, tablets, smart phones, or netbooks. Use any combination of available technologies, charged and ready to distribute to students.

Be able to develop your students and your curriculum with the best available technology. Everything in one place, ready when you need it. Progress with the Spectrum eVolve Multi-Tech Cart.

(see chart below for all of the  
eVolve cart product and  
option numbers)

**55480 eVolve Cart**

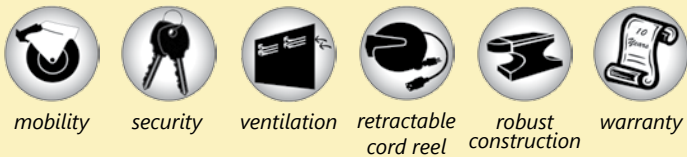

Soft, durable optional Foam Organizer (55486) cradles phones and/or small tablets while charging

**NEW eVolve Multi-Tech Cart™**

The image above displays the ingenuity designed into the eVolve™ Cart. Carts can be outfitted with optional Wire kits (55485). Kits are designed to support multiple devices.

**Design benefits:** (details on page 3)

**Advantages:**

- ▲ Aligns well with the bring your own device (BYOD) philosophy
- ▲ Curriculum can be expanded in a "best practices" application (match best device for chosen curriculum)
- ▲ Organization of all different devices in one place
- ▲ Ensure the ability to use your choice of technology in the future
- ▲ Two storage shelves support up to 16 full-size laptop computers, or 32 tablets or netbooks
- ▲ Product is limited to 32 devices based on power outlets
- ▲ Coated wire dividers protect devices from damage and can be installed to provide storage for tablets, laptops, netbooks, or a combination of all three
- ▲ Locking third door electrical compartment isolates and separates electrical line voltage from students
- ▲ Two 16-outlet power units with externally accessible on/off switches and reset buttons
- ▲ Overhead cord management bars keep charge cords organized and routed to each storage slot
- ▲ One standard handle provides control and mobility
- ▲ Padded shelves protect devices from damage
- ▲ Ventilated doors provide "chimney effect" airflow keeping equipment cool
- ▲ Cable grommets keep wires and cords organized
- ▲ Electrical system consists of UL Listed components
- ▲ All doors have double-bolt locks to secure equipment and electrical connections
- ▲ Four 5" balloon wheels (2 swivel directional locking) roll easily and quietly on uneven surfaces
