

HEAT-REFLECTIVE ALUMINIZED PBI/KEVLAR® CLOTHING

– protection up to 2000°F radiant heat, molten metal splash and sparks

Key Features and Benefits:

- Dual-layer construction consists of aluminized PBI/Kevlar® with ripstop knit and an inner layer of moisture-absorbing flame-resistant cotton. This fabric configuration provides a flexible, lightweight, and comfortable fit.
- Hood comes equipped with Oberon Face-Fit™ clear gold heat reflective window for panoramic visibility.
- Waist-length coat has a concealed zipper with inner and outer flaps. Sleeves include Nomex® knit expandable cuffs helping to prevent heat and molten metal splash from traveling up arm.
- Bib overalls are chest height to provide maximum protection from heat around all vital organs. Adjustable suspenders and flame-resistant hook and loop closures around waist and ankles allow for a comfortable and customized fit.
