

a-AB23EC Quick Start Guide

Switch On/Off

Main screen

Switch EC/TDS/SAL Mode -->

Switch Endpoint Mode -->

Auto end point mode

Continuous reading mode

Standard Solution Setup -->

Select the solution group

Note: Predefined standard solution: 10 µS/cm, 84 µS/cm, 1413 µS/cm, 12.88 µS/cm

Temperature Setup -->

Setup MTC temperature

Setup reference temperature

Setup temperature compensation

Calibration -->

Insert a probe into the standard solution.

Calibrating

Completed

TDS Factor Setup -->

Calibration result (shown for 3 seconds)

Confirm

Measurement -->

Insert the probe into a sample.

Measuring

Completed

Store/Recall Data

Store measurement data: After the measurement is completed, press the **Store** button to store.

Recall measurement data: After the measurement is completed, press and hold the **Store** button to recall.

Recall calibration data: After the calibration is completed, press and hold the **Cal** button to recall.

Install the stand-alone electrode holder

1. Screw the metal stick to the base.

2. Hold the button located at the bottom of the upper electrode arm, and pass the arm through the metal stick.

3. Release the button at the height you want to finish the installation.

(mostrado durante 3 segundos)

Medición -->

Almacenar / Recuperar Datos

Almacenar datos de medición:
Una vez completada la medición,
presione el botón Store.

Recuperar datos de medición:
presione y mantenga presionado
el botón Store para recuperar.

Recall calibration data:
After the calibration is completed,
press and hold the Cal button to
recall.

Instale el portaelectrodos.

1. Atornille la varilla de metal a la base.

2. Mantenga presionado el botón ubicado en la parte inferior del brazo del electrodo superior y pase el brazo a través de la varilla de metal.

3. Suelta el botón a la altura que quieras para finalizar la instalación.
