720p projector with rich accurate color, sharp graphics, wall color adjustment to accommodate various projection surfaces

3200 lumens and 25000:1 contrast ratio equates to bright colorful images with amazing black levels

Experience amazingly accurate color when watching Blu-Rays, HDTV Programming, and playing Xbox One/PS4 games with sRGB

Powerful and subtle changes to color tones and palette with BrilliantColor™

Outstanding lamp life reduces the overall cost of ownership

Full 3D

Optoma's H183X is perfect for the home and delivers a bright image suitable for daytime viewing with an impressive 3200 lumens. The H183X also features vividly accurate colors with sRGB support, Full 3D, and deep black levels with a 25,000:1 contrast ratio. These features translate to rich colors and sharp images while watching Blu-rays with the family on movie night, sharing vacation photos with friends or playing the latest video games.

The H183X weighs less than 6 lbs and is perfect for backyard movie night during family get togethers or catching up on favorite shows at a friends house. Wall color adjustment utilizes various gamma profiles to improve brightness on projection surfaces of varying color. This feature is extremely useful when projecting on a wall that may not be white in color.

Eliminate soft edges and jaggies on border of the projection image when watching standard definition movies and television with the Edge Mask feature. No need to worry about lamp replacement as the lamp can last up to an astonishing 8 years.
