

Product Overview

The Meeting Owl is a 360° video conferencing device that provides remote meeting attendees an experience that nearly feels like sitting in the room with the team.

The magic is the Meeting Owl's 360° video, audio and intelligence. It sits in the center of the conference room table, and automatically highlights different people in the room as they talk. The result is a much more natural meeting experience for the remote attendee. No need to ask someone to turn or shift the camera.

The Meeting Owl also brings simplicity to video conferencing. It is a USB device that requires no downloads, and it works with all popular web-based conferencing platforms (Google Hangouts, Skype, Zoom, etc.). As a wifi-enabled device, customers will receive new features over the air so their Meeting Owl gets even smarter over time.

Product Highlights

360° Video: The Meeting Owl can see in all directions at the same time with its 360° lens. This provides a panorama view of the room with no moving parts or stitching.

Automatic Speaker Focus: The Meeting Owl uses audio and visual cues to understand where everyone is sitting in the room, and will shift its focus automatically to highlight up to three speakers at a time. The resolution output for the highlighted speaker is 720p.

Exceptional Audio: The Meeting Owl has an 8-microphone array and can clearly pick up sound from people speaking 12-feet away (24 foot diameter.)

Plug-and-Play: No software downloads necessary. Plug the Meeting Owl's USB 2.0 cable into your laptop or in-room computer, and it works seamlessly with all major video conferencing platforms.

All-in-One: Combined mic, speaker, and camera simplifies the meeting room setup.

Price: \$799 MSRP. Only available in US and Canada.
