

JUST-A-STAND20

“This is a solid product that I would recommend to other school districts that are 1:1 and are looking to provide students a location to charge devices. Mounts solid to the stand, conceals and secures the adapters within the stand. I would recommend this product to everyone in a 1:1 environment.”

Omro High School - Kevin Carley

fits Tower20 & Tower20PLUS

WHY SCHOOLS LOVE TOWERS BY POWERGISTICS

STUDENT MANAGED

Empowering students to deploy devices allows for more time teaching and less time dealing with the hassles that we have become accustomed to with traditional carts.

SPEED OF DEPLOYMENT

Tower device management allows students to manage their own devices. Classes start when the bell rings allowing deployment of devices to be a nonissue.

OPEN CONCEPT

With the asymmetrical door and open concept of **Towers by PowerGistics**, teachers and IT staff now have the ability to immediately take visual inventory to see when the devices are missing or when the devices are not plugged in, even when the door is locked.

SECURITY

With the heavy duty steel door and visual inventory the **Towers by PowerGistics** have enhanced security while still retaining an open concept to visually track classroom devices.

QUALITY

Towers by PowerGistics are built with military grade aluminum and can handle the roughest of students. The full aluminum construction allows for a lightweight charging station and a natural heat sink to keep devices from overheating, prolonging device life.

MADE IN THE USA

PowerGistics proudly engineers, manufactures and markets all of our products in the heart of Wisconsin. Domestic manufacturing allows PowerGistics to listen to our customers and make changes to enhance the educational experience, quickly.

KEY FEATURES

WHAT ARE TOWERS BY POWERGISTICS?

1 STEEL CONSTRUCTION

Built with steel supports, the Just-A-Stand was designed to handle a Tower full of devices.

2 ADJUSTABLE FEET

Keeping your Just-A-Stand level is important. With an inch of play, you can make sure your PowerGistics Tower stands straight and tall.

3 STABILITY

Keeping with the small footprint of the Towers by PowerGistics, the Just-A-Stand legs allow for maximum stability within a small space.
