

TOWER20PLUS

“East Union School were looking for an alternative to our current portable carts. The carts took up a large amount of floor space and power cords would not stay plugged into the internal power strips if the carts were moved. In addition, the power cords would become tangled or get caught in the doors if the students were not careful when plugging in the computers, causing frayed cords. The PowerGistics vertical standing wall racks have eliminated all of those issues!”

East Union Technology Director -Lori Paup

holds up to 14” devices

WHY SCHOOLS LOVE TOWERS BY POWERGISTICS

STUDENT MANAGED

Empowering students to deploy devices allows for more time teaching and less time dealing with the hassles that we have become accustomed to with traditional carts.

SPEED OF DEPLOYMENT

Tower device management allows students to manage their own devices. Classes start when the bell rings allowing deployment of devices to be a nonissue.

OPEN CONCEPT

With the asymmetrical door and open concept of the **Tower20Plus**, teachers and IT staff now have the ability to immediately take visual inventory to see when the devices are missing or when the devices are not plugged in, even when the door is locked.

SECURITY

With the heavy duty steel door and visual inventory, the **Tower20Plus** has enhanced security while still retaining an open concept to visually track classroom devices.

QUALITY

The **Tower20Plus** is built with military grade aluminum and can handle the roudiest of students. The full aluminum construction allows for a lightweight charging station and a natural heat sink to keep devices from overheating, prolonging device life.

MADE IN THE USA

PowerGistics proudly engineers, manufactures and markets all of our products from the heart of Wisconsin. Domestic manufacturing allows PowerGistics to listen to our customers and make changes to enhance the educational experience, quickly.

KEY FEATURES

WHAT ARE TOWERS BY POWERGISTICS?

1 ANCHOR KEY-HOLE

Anchors the spine to the wall, while still allowing access to the back by lifting up the tower and pulling forward.

2 CABLE MANAGEMENT SYSTEM

Utilize the eyelet to lock each cable. This allows enough charging cable for the students to plug in their devices, yet locks the cable in place for a tangle free design.

3 BRIGHT SHELF COLORS

Wall mount towers come in an 8, 12, 16 & 20 shelf configuration. The 4 color shelves allow for a visual boost to any work/study space. Custom colors are also an option.

4 BASEBOARD CUTOUT

With many schools & offices having baseboard or trim around many walls, this cutout allows for seamless placement against the wall & floor.

5 POWERCORD ACCESS

Convenient access while storing our 12-15ft powercable.

6 FLOOR STANDING

The floor carries the weight while the wall mount keeps the tower upright.

7 OPEN CONCEPT DOOR

Allows for quick visual inventory of devices, while the steel door ensures security.

8 KEYED LOCK

2 position lock that requires a key ONLY to unlock door. Option for keyed alike, or keyed independent. (different keys for multiple towers)

9 SIDE STRIP

Allowing for extra security, the side strips lock the shelf into place & eliminates device access from the side.

TECH SPECS

Model #:	PGT2014
Tower Dimensions:	59" H x 11.25" W x 22.5" D
Shelf Size:	14.5" Deep x 10.5" Wide
Number of device slots:	20
Power Supply:	20V AC-50/60 Hz, 15 AMPS,
Shelf Spacing:	1.75"

Power Outlets:	20 internal outlets
Mobility:	Standardized Classroom Location - Wall Mount
Locking System:	A-Symmetrical Steel Locking Door
Shipping Weight:	54lbs
Product Warranty:	*Lifetime see website for more information
