ULTRA-SLIM BEZEL LED DISPLAYS

World's Slimmest Bezel 60"  
LED Displays\* For Virtually Seamless  
Multi-Screen Video Walls

Screen image simulated.

With the slimmest bezel in the 60" diagonal class\*, the PN-V600A/PN-V601A is the new standard for multi-screen video wall displays. Portrait and landscape compatibility, full array LED backlighting and virtually seamless borders help you create high impact video walls in almost any size and format.

## Sharp Ultra-Slim Bezel LED Displays Open New Opportunities

The PN-V600A/PN-V601A are the ideal choice for exciting, virtually seamless multi-screen video wall configurations. With professional design, high image quality and 24/7 certified reliability, the PN-V600A/PN-V601A brings almost limitless digital signage and display possibilities to shopping malls, airports, museums, stadiums, control centers and more.

### ● **Enlarge (Zoom) Display Mode (for up to 25 Monitors)**

The Enlarge (Zoom) Display mode can spread one image across up to 25 monitors (in a 5 x 5 configuration) from a PC. The Frame Width Adjustment function virtually eliminates misalignment and boldly enhances the enlarged image on a multi-screen display.

### ● **Full-Array LED Backlight**

To give the PN-V600A/PN-V601A more uniform brightness than conventional CCFL\* backlighting can offer, Sharp has positioned LED elements across the entire panel directly behind the liquid crystal layers, helping ensure that Sharp multi-screen displays are bright, beautiful and uniform.

### ● **PN-ZR01 Control Kit (sold separately)**

When one of the monitors in a multi-screen configuration is fitted with a remote control sensor box, all of the monitors can be conveniently operated through one remote control unit. And to help with overall energy savings, a brightness sensor automatically adjusts the brightness of the backlight to match the ambient lighting. (UPC: 074000069022)

## Almost Limitless Display Possibilities

Thanks to the PN-V600A/PN-V601A's ultra-slim bezel, the borders between neighboring monitors are a virtually seamless 6.5 mm<sup>1</sup> wide (2.4 mm on the right and bottom; 4.1 mm on the left and top).<sup>2</sup> When used in a video wall configuration, this enables the display of crisp and high impact images of almost any size and format. With 24/7 certified reliability and 3-year onsite parts and labor limited warranty, the PN-V600/PN-V601 is designed to be both exceptionally reliable and environmentally friendly.

\*1: Does not include the gap between the monitors. \*2: Non-display area for neighboring monitors is 7.1 mm.

### Create Dynamic Video Walls

Units: cm (measurements are approximations that include the bezel width)

Almost any number of PN-V600A/PN-V601A monitors may be joined together to create high impact multi-screen video walls. These configurations may be controlled through RS-232C or over a network.\* Their ease of control and ease of integration help simplify the design and installation of sophisticated video wall displays of most any size and shape.

\* PN-ZB02 input/output expansion board is required for network control.

## Professional Quality And 24/7 Durability

Because business never stops, neither do the PN-V600A/V601A Video Wall Monitors. These professional-grade products are rugged enough for continuous 24/7 operation in the most demanding professional applications. As with all Sharp Professional Displays, the PN-V600A/PN-601A is backed by an outstanding 3 year limited warranty covering parts and labor.

## Full Range of Connectivity

The PN-V600A/PN-V601A feature extensive interface capability. Add the optional input/output expansion board (PN-ZB02) for even more ways to connect your video wall installation to the content source your project requires.

## Choose the Model That Suits Your Needs

For environments with fewer ambient light sources, the PN-V600A is the lower-brightness alternative to the PN-V601A. It also consumes less power, which helps conserve energy and reduce operating costs.

## Create a 4K2K Ultra-High Resolution Experience

When placed in a 3x3 video wall configuration, the PN-V600A/PN-V601A standard resolution multiplies by three, creating a total resolution of up to 4098 x 2304 pixels for ultra-high resolution/ultra-high impact images.

## Mirror Frames (option)

In multi-screen configurations, mirror frames minimize the lines between slim-bezel PN-V600A/PN-V601A monitors by reflecting mirror images from the display content.
