Two separate displays sitting side-by-side can only mean one thing: a win-win situation. The DST940 from Peerless-AV mounts two displays on the same plane resulting in exceptional alignment. Behind the displays, a long plate spans both and the displays are attached with easy-glide brackets to ensure secured placement and ease of adjustability. Installation and adjustment has never been easier, because both displays slide horizontally and tilt up to 20 degrees to ensure the message is placed at its ideal viewing angle. This makes this mounting solution perfect for restaurant menu signage, airport flight information displays or entertainment and department store applications.

*The DST940 aligns two displays on the same plane, providing one continuous mounting surface for both displays.*

## Additional Features

- ✓ Single adaptor plate keeps the face of both displays on the same plane
- ✓ Easy glide bracket design ensures displays are securely attached to the adaptor plate
- ✓ Universal display adaptors quickly hook onto adaptor plate for fast installation
- ✓ Horizontal adjustment allows displays to easily slide together for a seamless appearance
- ✓ Tilt ranges from 0 to 20°

### TILT ADJUSTMENT

Large tilting range from 0 to 20° for optimal viewing angles

### UNIVERSAL MOUNTING

Universal display adaptors easily hook onto the wall plate for fast installation of displays ranging from 37" to 46"

### SINGLE PLANE ADJUSTMENT

Effortless horizontal adjustment allows for sliding displays together on one even plane

### SLIDING BRACKET DESIGN

Easy glide brackets ensure the displays are securely attached to the wall plate and easily adjusted

Continuous Tilt

Seamless Display Alignment
