# INNOVATION IN DESIGN

With a foundation in industrial design, our focus is to create simple products that solve complex problems. The best people, using the highest quality materials, creating solutions that are second to none.

## FROM CONCEPT TO CLASSROOM

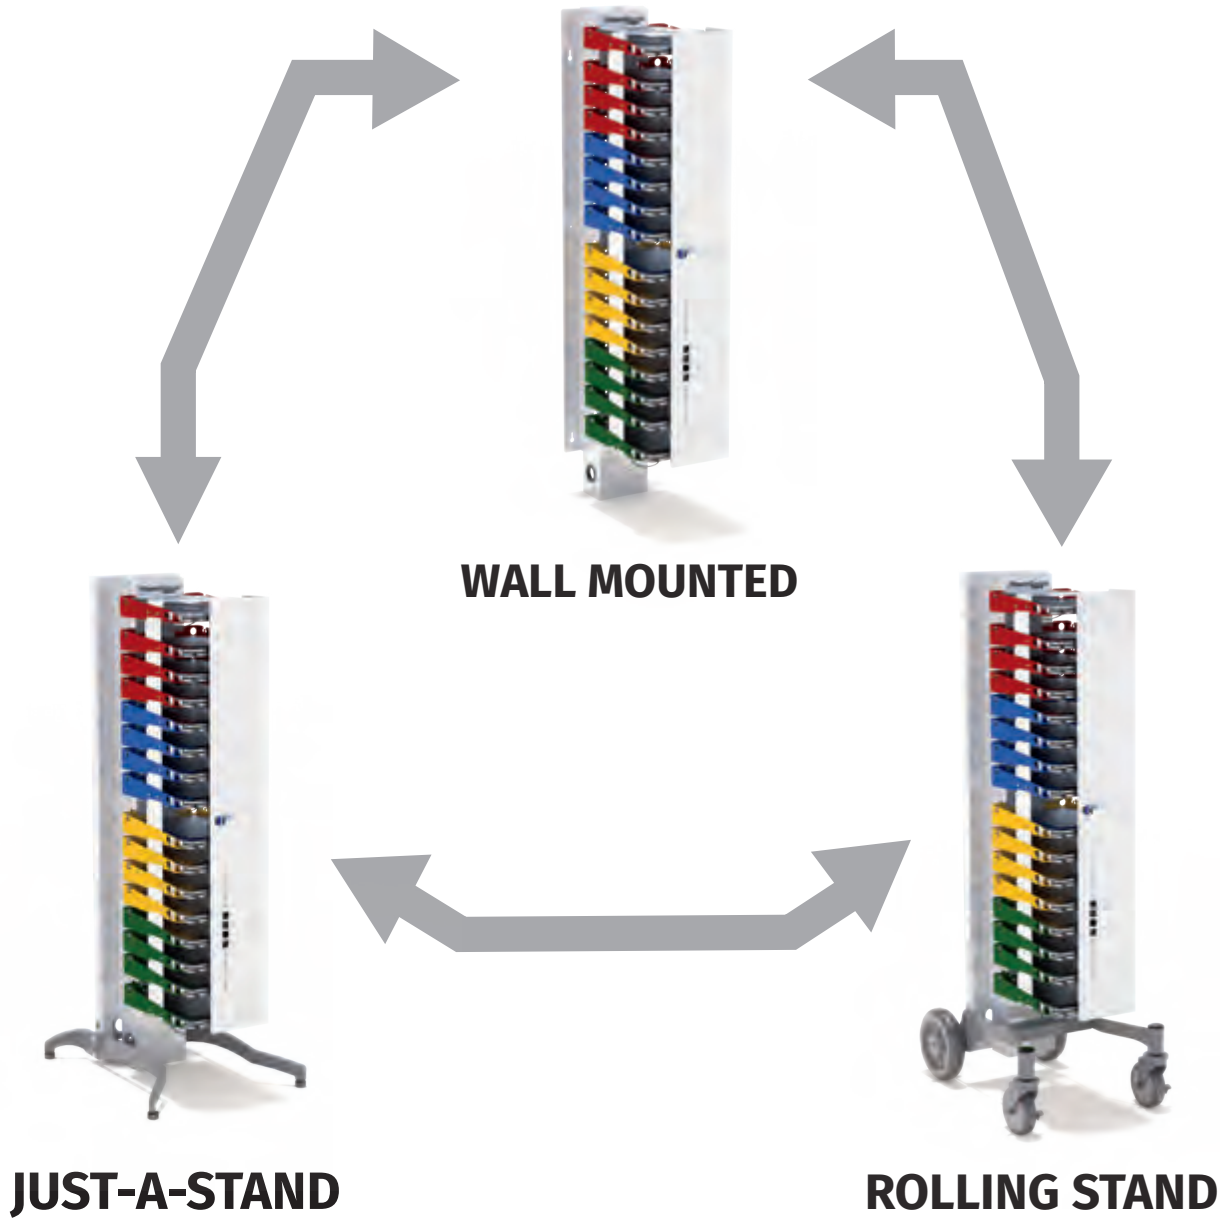

PowerGistics, a G.D. Roberts company, is a 5th generation family-owned business. From our beginning in 1870, we have been solving complex problems with simple solutions. We believe in providing products that make things easier, engineered with purpose and functionality in mind and built to last.

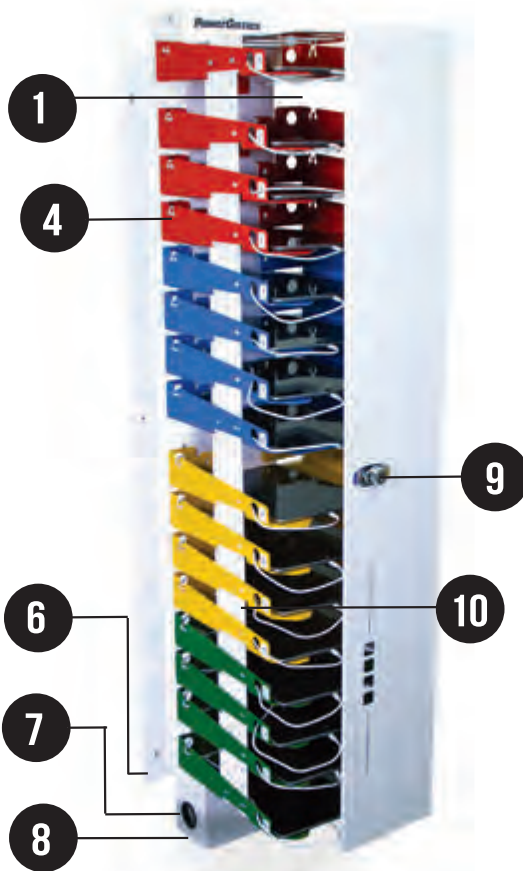

**DEPLOYMENTS YOUR WAY**

**ONE TOWER THREE  
DEPLOYMENT OPTIONS**

# KEY FEATURES

- 1 Open Concept Door:** Allows for quick visual inventory of devices, while door ensures security. The open design also allows for obstruction-free wireless updating.
- 2 Small Footprint:** Two of our Towers take up less than half of the square footage of a single cart.
- 3 1 Tower; 3 Options:** Choose now or later to add a static stand or rolling stand. Our Towers evolve with your needs.
- 4 Cable Management Eyelet:** Utilize the eyelet to lock each cable in place allowing enough cable to charge the device while eliminating loss and damage.
- 5 Colored Shelves:** The four-color shelves allow for multiple deployment options. Custom colors are also an option to show your school spirit.
- 6 Baseboard Cutout:** With many schools and offices having baseboard or trim, this cutout allows for seamless placement against the wall & floor.
- 7 Power Cable Access:** Convenient access while hiding the power cable.
- 8 Floor Standing:** Tower stands on the floor so the wall only holds the tipping weight.
- 9 Keyed Lock:** Lock requires a key only to unlock door. Option for keyed independent or optional padlock conversion kit available.
- 10 Side Strip:** Allowing for extra security and support, the side strips lock the shelf into place & eliminates device access from the side.

# SPLIT DEPLOYMENTS

For optimal time savings we recommend multiple Towers per classroom to split up deployment stations.

Save even more time by deploying devices during transitions.

## TOWER DEPLOYMENT VS. CART DEPLOYMENT

Help eliminate traffic jams, save time and reduce costs due to drops and cord management issues by switching to Towers.
