TOWER16

"I love how great they look, how easy they are to use and how little space they take up. Everyone can see that all the Chromebooks are charging so teachers don't have to worry about power management at all. The customer service has been incredible and I can't say enough good things about the product."

Kathleen Peak - The York School

holds up to 11" devices

WHY SCHOOLS LOVE TOWERS BY POWERGISTICS

STUDENT MANAGED
Taking the teachers out of device deployment, allows for more time teaching and less time dealing with the hassles that we have become accustomed to with traditional carts.

SPEED OF DEPLOYMENT
By allowing students to manage their own devices, we have been able to cut down deployment time to almost nothing. Classes can start when the bell rings allowing the charging and storage of devices to be a non issue.

OPEN CONCEPT
With the A-Symmetrical door and open concept of the **Tower16**, teachers and IT staff now have the ability to immediately see when the devices are missing or when the devices are not pluged in.

SECURITY
With the heavy duty steel door, and visual inventory the **Tower16** has maximized security while still retaining an open concept to visually track classroom devices.

QUALITY
The **Tower16** is built with military grade aluminum and can handle the roudiest of students. The full aluminum contruction allows for a light weight charging station and a natural heat sync to keep devices from over heating during the charging process.

MADE IN THE USA
PowerGistics proudly engineers, manufactures and markets all of our products in the heart of Wisconsin. Domestic manufacturing allows PowerGistics to listen to our customers and make changes to enhance the educational experience, quickly.
KEY**FEATURES**

WHAT ARE TOWERS BY POWERGISTICS?

devices/cables not included

1 ANCHOR KEY-HOLE
Anchors the spine to the wall, while still allowing access to the back by lifting up the tower and pulling forward.

2 CABLE MANAGEMENT EYELET
Utilize the eyelet to lock each cable. This allows enough charging cable for the students to plug in their devices, yet locks the cable in place to eliminate loss & damage.

3 CUSTOM SHELF COLOR
Wall mount towers come in an 8, 12, 16 & 18 shelf configuration. The 4 color option allows for a visual boost to any work/study space. Custom colors are also an option.

4 BASEBOARD CUTOUT
With many schools & offices having baseboard or trim around many walls, this cutout allows for seamless placement against the wall & floor.

5 POWERCORD ACCESS
Convenient access while hiding our 12-15ft powercable.

6 FLOOR STANDING
The floor carries the weight while the wall mount keeps the tower upright.

7 OPEN CONCEPT DOOR
Allows for quick visual inventory of devices, while the steel door ensures security.

8 KEYED LOCK
2 position lock that requires a key ONLY to unlock door. Option for keyed alike, or keyed independent. (different keys for multiple towers)

9 SIDE STRIP
Allowing for extra security, the side strips lock the shelf into place & eliminates device access from the side.

TECH SPECS

Model #: PGT1611
Tower Dimensions: 58" H x 10" W x 16.5" D
Shelf Size: 11.5" Deep x 8.75" Wide
Number of device slots: 16
Power Supply: 20V AC-50/60 Hz, 15 AMPS,
Cooling: Slots for air movement around PowerStrip

Power Outlets: 16 internal outlets
Mobility: Standardized Classroom Location - Wall Mount
Locking System: A-Symetrical Aluminum Locking Door
Shipping Weight: 41lbs
Product Warranty: *Lifetime
See website for more information
