DESCRIPTION

The FTP-FCTA4W-QL combines the FTPW, universal fine-tune mount for projectors up to 65 lb., with a PP-FTCA-QL, a false ceiling adapter with quick-lock cable. It also includes a four inch pipe (PWH-4W) with a cable routing outlet. The FTPW's enhanced fine-tune features allow the installer to adjust pitch, roll and yaw independently and without tools. After aligning the projectors image to the final projection settings, the FTPW can be locked in position with a knurl knob. The PP-FCTA-QL allows precise projector placement while hidden above ceiling tiles within the T-bar frame. The FTP-FCTA4W-QL was designed to integrate with a new or existing suspended ceiling structure.

FEATURES

- Innovative patent-pending mechanism enables smooth finger-tip alignment (no tools required)
- Includes quick installation disk for direct ceiling installation
- Projector includes universal mounting legs (four long pre-installed, two short) with post-installation leveling barrels
- Adapter plate sits hidden above the ceiling tile within the T-bar frame
- Includes 100 ft. of braided cables with looped ends and quick locks
- Hole-cutting escutcheon ring
- Lock-It™ security hardware and leveling barrel provides added protection
