DESCRIPTION

This configuration includes three, triple articulating arm mounts and a 42" pole with extrusion track base. Many monitoring consoles use aluminum extrusion or track rails to mount and position video display monitors. Use a pole extrusion base to upgrade and refurbish consoles with older displays. Each mounting head provides 90° of omni-directional movement. Included set screws allow the mounts to be positioned anywhere along the pole.

FEATURES

- Mounting head provides 90° of omni-directional movement
- Key hole mounting slots for faster installations
- Base can be installed on 1.5" on center T slot channel or single T slot channel
- Set screws allow the mount to be positioned anywhere along the pole
