

### Features

- Economical, efficient method of storing static sensitive electronic devices
- Provides physical protection with conductive material providing reliable path-to-ground
- Convuluted static dissipative  $<1 \times 10^{11}$  ohms per ANSI/ESD STM11.11 polyurethane pink foam laminated to top and fitted in bottom
- Meets ANSI/ESD S20.20 and Packaging standard ANSI/ESD S541
- Constructed from conductive extruded high impact polypropylene plastic; provides superior strength and durability
- Chemical and moisture resistant
- Ideal for use where corrugated and/or paper products cannot be used
- Economical alternative to injection molded products
- Made in the United States of America

Per Packaging standard ANSI/ESD section 6.2 Outside an EPA "Transportation of sensitive products outside of an EPA shall require packaging that provides:

1. Low charge generation.
2. Dissipative or conductive materials for intimate contact.
3. A structure that provides electrostatic discharge shielding."
