

A close-up, macro photograph of a dog's nose and the surrounding fur. The nose is large, black, and has a textured, pebbled appearance. It is surrounded by long, light-colored, wispy fur that frames the nose. The background is blurred, showing more of the dog's fur and some green foliage.

CASE STUDY

QOMO Interactive Presentation Solutions Make a Great Taylor County School District Even Better

MISSION STATEMENT Every Child, Every Day. Every student will interact with each of his teachers every day. It is not only for the interaction but to make the teacher more aware of how the student learns. "There are six ways of learning and six ways of teaching," says Taylor County Schools Superintendent, Roger Cook.

CHALLENGE How do you make a great school system better? Taylor County has the Distinguished School Award from the State of Kentucky. **For the last eight years, it has had zero dropouts and a 100% graduation rate. Every student is tested every year and yet the school district remains in the top 10% of Kentucky schools.**

The high school has 12 fields of study from Cosmetology to Culinary. Also included are Nursing, Aviation (two students became certified pilots), and drones. The students run their own bank, run their own supermarket and a clothing store where students make and sell their own clothing. High school special needs students run a T Bay which is like an E Bay. In middle school, there is an animation program where students create and sell animation commercials for local business.

There are no grades. The student goes to classes where he/she is mentally challenged not where he/she is chronologically. If after 8 weeks or so, the student can show mastering the subject, he/she may go on to the next level.

If the student wants to drop out he/she must meet with Mr. Cook and he will say no. He gave an example where a student wanted to be an auto mechanic because he/she likes to work on cars. Mr. Cook said that they will provide him/her with math as it relates to the internal combustion engine, science as it relates to the internal combustion engine, the history of automobiles, and English as it pertains to reading and writing for repair manuals.

"There are six ways of learning and six ways of teaching."

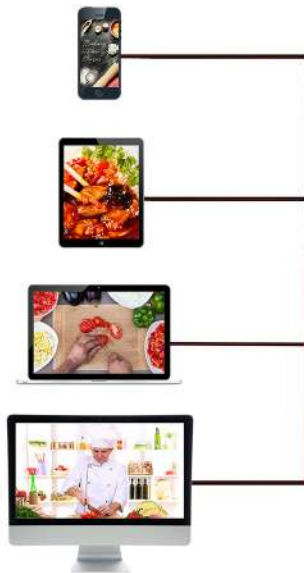

- Roger Cook, Taylor County Schools Superintendent

SOLUTION Taylor County purchased 80 Quest panels, 42 Journey 13 Series, and 83 QConnects. After reviewing various touch board providers, Roger Cook chose QOMO for their solution. Taylor County has had many interfaces with many companies of this sort. The QOMO Touch Panels were selected because they gave the best bang for the buck. QOMO and especially Kevin Talentino, President of QOMO, backs their product. Other providers will sell but disappear when help or replacement is required. QOMO will make the sale, install the equipment, train, be available for questions, and follow up on the installation and teacher usage. The QOMO Touch Panel coupled with QConnect and Doc Cams provide the teachers the tool box for anything they need to increase subject understanding and make learning fun.

BENEFITS Roger Cook says that he can have meetings without every teacher coming to the Central Office. He can communicate with the parents who have access to the Internet. He used it to get his Nickle Tax passed which funded the new schools and new technology. The QOMO Touch Panels are used by Mr. Cook and teachers to make presentations at Board of Education meetings.

New encryption options keep your wireless network safe and secure.

QConnect

QConnect

- 64+ Users
- Configure Multiple Devices
- Windows & Mac Compatible
- 4-Way Split Screen Display

No matter what size your audience, QConnect has the power to reach everyone!

Did you know 1/3 of students have a hard time hearing in class?

The Audio System That You Asked For

60-75% of all learning is auditory, so the need for sound enhancement in the classroom is extremely important. Composed of one lavalier microphone and two IR speakers, the QSonics1000 is designed to be simple enough for both portable use or permanent installation.

QSonics1000

- 2 Speakers
- 1 Lavalier Mic
- Head Set

QOMO Podium

QIT600 F1

The QIT600 F1 is a wide screen interactive monitor that gives presenters full control of their displayed screen with smooth and ultra-fast annotation response time, plus comfortable simulated hand-writing. On a desktop, it is a powerful tablet that allows you to draw with incredible precision and detail.

Laser (Lamp-free) Projector

QP8000T

QP8000T is a touch of brilliance with unbeatable 3,300 lumens laser bright images, built-in speakers, and low maintenance. Changing lamps is a nuisance of the past, and with the QP8000T you can save time and money!

Make it interactive!

With any of these add-ons

1. IR Pen

Easy-to-use and ergonomic
No installation necessary

2. IR Light Curtain

Takes up minimal wall space
Supports 10 point touch

3. Capacitive Touch Board

Most advanced touch technology
Supports 30 point touch
Dry-erasable surface allows
writing without interference

Command Center

QPT200

Ergonomic pens that pair universally with any panel or whiteboard using QOMO's Flow!Works Pro annotation software. The QPT200 includes hot keys, rechargeable holders, an extendable wand, a responsive eraser, and two QPens. The QPen allows users to change their writing colors as well as switch between slides and PPT presentations.

Accessible, Durable, and Easy to Adjust

Balance Box Tilt

Balance Box Tilt is an innovative, height-adjustable mount for panels. With a touch of your finger, you can move the panel up or down and tilt it up to a 60 degree angle. The panel stays where you want it. No electricity needed!

The mobile stand offers mobility as well as adjustability. With a stand built from steel and fitted with casters, Balance Box is a sturdy option for any classroom or conference room.

Balance Box features:

- Height-adjustable mounting system
- 16" vertical movement
- Comfortable access for people of any height
- Patented spring system
- Feather-light movement
- Easy 30-minute installation

We are here to help you succeed!

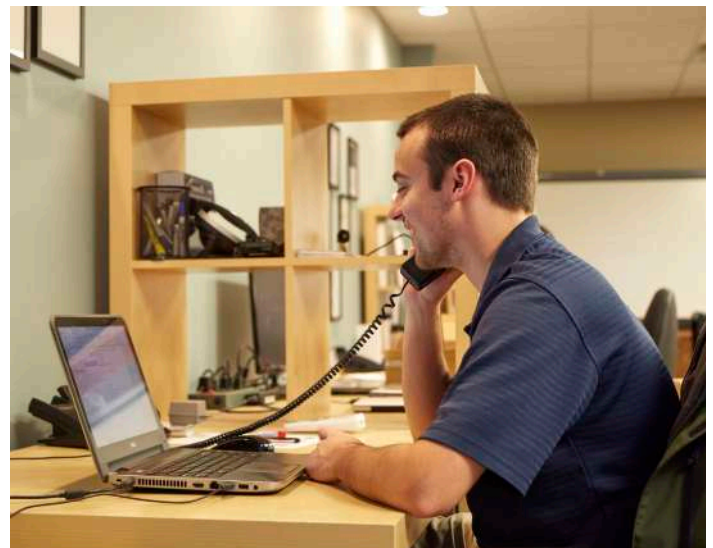

"Tell me and I forgot. Teach me and I remember. Involve me and I learn." -Benjamin Franklin

Professional Development And Technical Support

Not only do we provide the most advanced and diversified interactive technology on the market, QOMO also provides excellence in service. We have professionals who can help from the beginning of the purchasing process, to installation, and even professional development for staff and curriculum. **We love to work with you!**
