

**QUICK375A+ /375B+ESD**  
SELF-FEEDER SOLDERING STATION

Features:

1. Ceramic heating element, long life time, 24V DC heating, safe and reliable.
2. Temperature controlled by RTD sensor, rapid heating, temperature precise and stable.
3. Imported motor, automatic feeding, sliding switch design. More functions available and adjustable, such as feeding speed, feeding volume, interval time, backing time etc.
4. Two operation modes: auto and manual.
5. Soldering direction may be changed as needed.
6. Suitable for soldering connectors, adapters and soldering under other special conditions.

Specifications:

Power consumption:	60W
Temperature range	200°C-480°C
Diameter	0.6, 0.8, 1.0, 1.2, 1.4mm
Feeding interval time	0-2.7s
Feeding speed	About 2.7mm/s-27mm/s(36° /s-360° /s)
Feeding volume	0-150mm
Backing time	0-0.9S (about 0-25mm, regular speed: 360° /s)
Feeding mode	Auto (1-9)/Manual (0)
Temperature stability	±2°C(stationary air, no load)
Solder wire usable	≤1kg (roll)
Weight	About 2.6kg
