The MAC3 Camera can be used as a "live-image" HD (1080p) camera or as a USB2.0 camera with a USB cable connected to any computer or Windows tablet. The camera can be connected to any microscope or optical system with a C-mount so you can instantly upgrade your system. With a monitor mounted directly to the camera, limited workspace is never a problem and your ergonomics will improve as well.

Contact us for a live online demo with your parts.
