**Only used when installing SLB Interface brackets.

Installation:

⚠️ **WARNING: OVERTIGHTENING OF SCREWS CAN DAMAGE PARTS AND LEAD TO SERIOUS PERSONAL INJURY AND DAMAGE TO EQUPIMENT! DO NOT over tighten screws when installing interface brackets.**

NOTE: Step 1 is only required when installing an SLB Interface bracket. If an SLM bracket is being installed proceed to step 2.

1. Screw six thumb screws onto six 10-24 x 5/8" Philips pan head screws. <u>DO NOT fully tighten thumb screws at this time.</u>

2. Turn projector upside down on a flat surface.

3. Place the interface bracket onto the bottom of the projector lining up the four out side holes in the bracket with the four threaded inserts in the bottom of the projector.

4. Slide the nylon spacer between bracket and the projector, lining it up with the front mounting hole in the bracket.

5. Place the four M4 X 12mm mounting screws and M4 washers in the four out side holes and the M4 X 25mm mounting screw and M4 washer in the front mounting hole and through the nylon spacer by hand, secure all five fasteners at this time.

NOTE: Security screws can be substituted when mounting Interface bracket to projector by using the parts and installation instructions in the All-Points Security Kit.
