SafeGuard X-Frame

The use of tablets within the retail and hospitality environments is re-writing the ground rules for customer service and increasingly, POS. Their use as an in-store information point is obvious but developers are tapping into the real advantages of using these devices as part of the POS infrastructure.

Other applications abound where tablets can provide information-based solutions. Kiosks provide guided selling, product look up and ordering. In the back office, inventory control, product availability and quality control are key. For the hospitality industry, mobile order taking, processing and kitchen management are important requirements of today's catering environments.

With so many variations on applications and types of device, mounting options are more diverse than ever, requiring flexibility and style whilst ensuring security. X-Frame is the ideal solution for the most comprehensive range of Android™, iOS™ and Windows® based tablets.

The X-Frame broadens the overall scope of technology mounts for tablets, in effect enabling an ability to service all customer tablet requirements with this highly flexible design. It combines a traditional retail focus and knowledge with a new aesthetic design to meet the growing demands and use of tablet technology.

X-Frame is a lightweight, easy to handle, low profile solution that keeps the essential buzz of using a tablet whilst offering a secure mount with a range of options depending upon the requirements of the application.

Product Portfolio

Desktop Mounting for iPad 2, 3 & 4 (SPXF101-02)

Key features:

- Secure light weight 2 piece frame that clamps around the tablet
 - Maintains tablet aesthetics and feel
- 120mm pole with internal cable management
 - 98mm footprint
- 0-70 degree tilt featuring patented DuraTilt® in-built tilting mechanism
 - Tested through 250,000 cycles
- Quick & simple installation

Desktop Mounting for iPad 2/3/4 (SPXF102-02) - Portrait to landscape rotation

Key features:

- Secure light weight 2 piece frame that clamps around the tablet
 - Maintains tablet aesthetics and feel
- **Portrait to landscape rotation - left or right**
- 120mm pole with internal cable management
 - 98mm footprint
- 0-70 degree tilt featuring patented DuraTilt® in-built tilting mechanism
 - Tested through 250,000 cycles
- Quick & simple installation
