

Clean connectivity with incredible color.

USB-C connectivity with an advanced panel

Connect PCs, tablets and smartphones to the Samsung S60UA series monitor, quickly and cleanly. USB-C transmits everything you need through a single cable: display input, data, power and Ethernet (LAN). It makes for easier installation, more cost-effective maintenance and cleaner workstations. The S60UA series features an IPS panel (24" and 27" only) with HDR10 and support for over 1 billion colors, for accurate, lifelike color and images. QHD resolution means more content on the screen at once with incredible detail, and the three-sided bezel-less design is ideal for more productive multi-monitor setups.

Key Features

Versatile USB-C connectivity and Ethernet (LAN)

A single cable connection transmits a digital display signal, data (USB) and Ethernet (LAN) (27" and 32" models) while simultaneously charging your device (up to 90W for 27" and 32"). Connect any PC, tablet or mobile device that has a USB-C port, and you'll have an instant workstation. Your device will be charged through the monitor and up to three peripherals can be plugged directly into the monitor.

DisplayPort Daisy Chain

Easily connect up to four FHD screens or two QHD screens with just one connection between them, eliminating the need to connect each one to the PC. You can extend your desktop with MST technology or duplicate your desktop with SST technology.

QHD (2560 x 1440) high resolution

The S60UA series delivers stunning, lifelike image quality with high pixel density and fine detail. With 50% more pixels than standard 1080p monitors, professionals can view more lines of code, more detailed design images, more content on the screen with smaller fonts that are legible, and be more productive.

1 billion colors with HDR10

With a wide range of colors and near-limitless hues, you'll enjoy content in stunning color accuracy and detail. Combined with HDR10, which makes dark colors darker and bright colors even brighter, every piece of content can be experienced exactly as intended.

Fully adjustable stand and VESA-compatible

The S60UA series swivels, tilts, pivots and is height-adjustable, for greater user comfort. And since the monitor is VESA-compatible, installation on a wall or separate mounting arm is easy.

Split Screen (PBP) and Picture in Picture (PIP)

Connect two separate sources to an S60UA series monitor and view them simultaneously. Code in one window and see the results in the other. Included software makes window management easy.

Assembled in Mexico
