

Raise your standards. Not your budget.

High-quality monitors for budget-conscious businesses

There's no need to compromise on productivity. The Samsung T37F series monitors feature IPS panel technology for bright, vivid colors. The sleek, three-sided bezel-less design is ideal for virtually seamless dual-monitor setups. 178° viewing angles aid collaboration by ensuring all team members are able to view the displays with no color washout, even from off-angles. Advanced Flicker Free technology and Eye Saver mode help reduce eye strain and fatigue, adding to user comfort and productivity over the workday. HDMI and Display Port connectivity simplifies installation. And energy-saving features reduce TCO by reducing power consumption up to 10%.

Key Features

Impressive picture quality

The T37F series features an IPS panel for exceptional picture quality, with vibrant color reproduction and crystal-clear images and text without color shift. IPS technology also provides wide viewing angles of 178°, so content isn't degraded when viewing at off-angles and collaboration is easy.

Ultra-thin bezels

Text and graphics are beautifully presented in a 3-sided bezel-less frame, so you see more picture and less plastic. With ultra-slim bezels, dual-monitor configurations are virtually seamless.

Fast, easy connectivity

With HDMI and Display Port, users can plug multiple devices directly into the monitor.

AMD FreeSync

AMD FreeSync technology helps avoid tearing and reduce stuttering, ensuring smoother video display and playback.

75Hz refresh rate

The T37F series features 75Hz refresh rate, for a more fluid and flawless picture. Everything you watch and play is smooth with no lag or ghosting, for better picture quality, reduced eye strain and an overall better experience.

Easy on the eyes

Eye Saver mode lowers blue light levels, for reduced eye strain during long work hours. Flicker-free technology adds further viewing comfort by eliminating flickering at all levels of brightness.

Save power and still see it all

Eco Saving Plus technology reduces power consumption by up to 10% while still maintaining picture quality. It adjusts the brightness of the screen's black sections while simultaneously adjusting RGB gain values, so the screen appears to remain just as bright as before.

Assembled in Mexico
