

The downside: you'll want to work longer.

QHD resolution monitors with ultra-thin bezels

Everything looks better on the right monitor. The Samsung S60A monitors feature high QHD resolution IPS panels (24" and 27" models) for lifelike images full of rich color and sharp detail. Adaptive Picture technology ensures those beautiful images can be easily viewed day or night by adjusting screen brightness to optimum levels based on the room environment. With 3-sided bezel-less frames, the S60A monitors are ideal for multi-monitor setups. And 178° viewing angles mean beautiful images even when viewed at off-angles, which greatly aids collaboration with your team.

Key Features

QHD (2560 x 1440) high resolution

The S60A series delivers stunning, lifelike image quality with high pixel density and fine detail. With 50% more pixels than standard 1080p monitors, professionals can view more lines of code, more detailed design images, more content on the screen with smaller fonts that are legible, and be more productive.

IPS panel and 3 sided bezel-less design

IPS panels (24" and 27" models) offer premium picture quality, with crystal-clear images and text without color shift for better work performance. The S60A series features a 3-sided bezel-less frame, which is ideal for seamless multi-monitor setups. And wide 178° viewing angles ensure optimal viewing from any angle, aiding collaboration.

HDR10 with over a billion colors

With HDR10 and over 1 billion colors, you get excellent color accuracy and detail with a wider range of color, which shows content exactly as the creator intended. HDR10 provides a higher level of contrast between light and dark images, for a more realistic picture.

USB Hub

With three USB 3.0 ports and one USB 2.0 port, you can declutter your desk by connecting your peripherals to the monitor. And you can quickly charge your mobile device via USB 3.0.

Split Screen (PBP) and Picture in Picture (PIP)

Connect two separate sources to the display and view them simultaneously. Included Easy Setting Box software makes window management easy.

Fully adjustable stand and VESA-compatible

Adjust the height, tilt, swivel and pivot to a position that suits you. The slim metal base adds to the clean sophistication, while VESA compatibility makes installation on a wall or mounting arm easy.

Easy on the eyes

Adaptive Picture technology automatically adjusts brightness and color temperature for optimized viewing in any environment. Eye Saver Mode lowers blue light levels, for reduced eye strain during long work hours. Flicker-free technology adds further viewing comfort by eliminating flickering at all levels of brightness.
