

NEW Simpson Electric 1000A/400A Series Digital Power Clamp

Simpson Electric's NEW 1000A/400A Digital Power Clamp is specially designed with user safety and comfort in mind, for measurement of AC/DC power and power quality parameters. The Clamp also features resistance, continuity, diode, and non-contact voltage detection.

Features & Benefits

- LPF mode for accurate measurement at VFD
- Built-in 3-phase power measurement with auto calculation
- Horsepower (HP) measurement to check motors and energy measurement
- Data hold function for hands-free operation
- Backlit, dual display of simultaneous parameters for measuring input quantity
- Durable design protects clamp from dust and water
- Up to 49 individual harmonics to understand power quality
- Rotational jaw to keep display in front and trigger at back to enhance user safety
- Double mold casing for firm grip
- MADE IN THE **USA**

2 Year Warranty
