## OVERVIEW

---

HDN-4 DUO is a dedicated multi-platform KVM switch capable of managing four 4K computers with a USB keyboard-mouse combo and two HDMI monitors. The HDN-4 DUO's dual-head HDMI connectors deliver top quality 4K Ultra-HD (3840x2160 @30Hz) for highly detailed visual operations. Both DisplayPort and DVI video connections are also supported via adapters (sold separately), and the device is backwards compatible with prior HDMI versions.

The USB emulation technology utilized by HDN-4 DUO enables immediate hot key source switching through the connected USB keyboard and mouse. Additional USB peripherals can be attached, like a USB printer. RS-232 control and front panel switching are supported.

### SOURCE SWITCHING MADE EASY

The HDN-4 DUO provides a simplified management approach for four HDMI equipped computers USB 2.0 outputs for a keyboard, mouse and other USB peripheral devices. This dynamic KVM console can be controlled via keyboard hot-keys or RS-232 commands, as well as directly through the console's easy-to-read front panel.

### EDID PASS-THROUGH

The HDN-4 DUO features EDID Pass-Through technology, which enables smooth and efficient switching, making the device easy to implement in virtually any scenario. This plug-and-play EDID functionality makes set up hassle free and simple.

### FULL USB KEYBOARD AND MOUSE EMULATION

The HDN-4 DUO simulates the presence of a keyboard and mouse for every attached computer through a USB cable. The USB keyboard and mouse emulation utilized by HDN-4 DUO allows for quick source switching and prevents signal interruption from other devices.

## REAL-WORLD APPLICATIONS

---

The HDN-4 DUO has a broad range of applications, but the main function is to centralize the access of up to four computers that support HDMI displays in a single workstation. Not only does it function as a KVM console, but it also supports USB 2.0 functionality. This allows users to access nearby USB device, including those not supported by other KVM switches. The HDN-4 DUO is the ideal solution for medical, industrial, studio and defense applications, where it is not practical or safe to have multiple CPUs in the vicinity of the workstation.

## FLEXIBLE CONTROL

**RS-232:** Any external device or program supporting RS-232 can control the HDN-4 DUO. The HDN-4 DUO uses a very simple protocol that enables easy integration with other devices.

**USB/KEYBOARD:** Hot keys enable the user to switch and control all the different functions of the KVM switch.

## FLEXIBLE SHARING

**INDEPENDENT SIMULTANEOUS DEVICE SELECTION:** Flexibility is key with the HDN-4 DUO. It enables the use of a USB keyboard and mouse of one computer while other USB peripherals such as scanners and printers are connected to other computer sources. HDN-4 DUO maintains the ability to switch all connected devices to any one of the computer sources as with any other KVM switches.
