

BLUETOOTH BRACELET

products for measuring body temperature and social distance

BLUETOOTH BRACELET FOR THE DETECTION OF THE BODY TEMPERATURE AND SOCIAL DISTANCE.

Clock bracelet that vibrates in case of excessive proximity to other people wearing the same device and indicates body temperature, helping to maintain safe distances.

The device uses bluetooth technology: it does not geolocate and is not connected to any App, avoiding transmitting sensitive data in full respect of privacy .

Easy to use and wear, even in damp environments or in the shower thanks to IP68 protection, helps to avoid gatherings.

Ideal for restaurants, nightlife, gyms, swimming pools, beach shores, museums, cinemas, theaters, schools, universities and companies.

Cod. BR-COV
