FEATURES

- Includes three 12-outlet electrical units with overload protection with on/off switch for charging device.

- Three rows of vertical polypropylene shelf dividers store and protect devices from scratching.

- Power management system operates in three power modes.
    - **Round Robin:** Charges all devices through power cycling and monitors battery life to send charge to the most discharged bank.
    - **Turbo Mode:** Dedicates power to a single device and charge 12 devices quickly.
    - **Auxiliary Mode:** Shuts power off from the device electrical banks and provides power on top for printers or scanners.

- Laser cut numbering for easy device coordination and organization.

- The left side panel includes a cord winder to keep the power cord neat and out of the way when not in use.

- Cord management in the back of the cart is provided by shelves that secure cords and adapters.

- A grommet hole on the upper right panel allows a wireless router to rest on the top shelf and plug into the dedicated 1 amp outlet on the underside of the top shelf for a mobile wireless lab. The wireless outlet is always hot as long as the cart is powered regardless of the operating mode.

- Easy rolling 5" all swivel casters for tight spaces and two can be fixed anytime to provide added directional control.

- Ships fully assembled and ready for use.

- Constructed using an average 30% post-consumer recycled steel content and finished in environmentally friendly powder paint. Steel components are 100% recyclable at the end of the product life cycle. The SOVA 36M has achieved GREENGUARD GOLD Certification and is UL 60950-1 Certified for Safety of Technology Equipment.
