The InTouch32 Secure Tablet Locker was developed directly from our customers' requests to individually manage their 1:1 tablet programs and keep the devices safe and secure within the classroom. The large capacity, small footprint of the IT32 allows instructors to easily manage the entire tablet inventory in one location. Careful consideration is given to cord management by placing a charging plug in front of every slot for easy tablet organization and access.

The IT32 Locker secures tablets with Spectrum's custom protective double-bolt lock. There are no plastic pieces easily pried open – the IT32 exterior consists of 16 gauge steel. Further security measures can be taken by bolting the IT32 to either a wall or worksurface. Safety measures are designed into the electrical system as well with all outlets located in a separately locked bay.

For the ultimate in 1:1 device security and organization, look no further than the InTouch32 Secure Tablet Locker!

InTouch 32 Secure Tablet Locker™

55434 CW

Our lockers are designed to store, charge, and secure tablets in one location. For added security the locker can be bolted to a worksurface, tablet access is protected by a double-bolt lock

55434 CW

To protect students, only low-voltage plugs are accessible on the student side of cart. The plugs are conveniently located directly above each tablet slot

55434 CW

AC Power is kept separate from the student side. A removable/locking panel prevents tampering and provides quick access. Vents provide chimney-effect cooling

Advantages:

- ▲ **InTouch32 manages up to 32 tablet computers**
- ▲ Safe and robust tablet storage and charging for an entire classroom in one central location
- ▲ Small footprint holds 32 Tablets
- ▲ Stores and charges most popular tablets including iPads
- ▲ Wide slots will accept tablet covers/cases, no need to remove them
- ▲ Overhead cord management allows cord to hang directly above each tablet
- ▲ Double-bolt locking door and steel construction provides security
- ▲ For added security the unit can be bolted to a worksurface
- ▲ Separate, locking AC voltage wiring compartment keeps AC power separate from DC power cords
- ▲ Plastic dividers protect tablets and keep them well organized
- ▲ Generous spacing between outlets allow use of larger power plugs

Customer Preferred Options:

55142 Replacement Key Set

Includes two metal keys and works on all Spectrum double-bolt locks
