

Many of our Desk products have been indoor air quality certified. Find out more on our web site or call.

Flex Insight Desk

A new horizon has come into sight for classrooms of the future!

Spectrum Industries' latest flexible computer workstation provides an extremely useful and value-driven solution for multi-use classrooms.

The Flex Insight allows the reconfiguration of a lecture room to computer room in seconds. With convenient keyboard and mouse storage and with computer cords safely hidden from sight, the Flex Insight Desk could serve as a stand-alone computer desk. Even with the monitor up, students can maintain clear eye contact with the instructor. With the monitor down in a lecture environment, a full 19" of uninterrupted writing surface is provided, making the Flex Insight a remarkable multi-use desk!

Spectrum's Flex Insight Desk is ideal for multi-functional and reconfigurable learning environments.

38957 CHB
 Double desks are more economical and realize better space utilization

Computer use!

Lecture or study!

Advantage:

As with all Spectrum products, quality is outstanding, as evidenced by the unique heavy-duty column that the monitor is attached to. Yet the monitor is so easy to lift and set down, even small children can safely and readily manage the Flex Insight Desk. Spectrum's new computer workstation is flexible enough for children and adults alike to ergonomically use. Proprietary mounts allow monitors to be tilted up and down as well as right to left in order to maximize ergonomics and minimize screen glare. At the same time, the mount's stop feature prevents the monitor from being damaged by the desk's surface when raising and lowering the unit.

Monitor size is not limited by a small storage compartment, freeing the possibility of future flat panel monitor upgrades of up to 24". The keyboard and mouse are stored conveniently under the monitor, eliminating keyboard trays that can easily become damaged while taking up valuable leg space.

There is no other multi use desk that can combine capability and value like the Flex Insight Desk. Flexibility has never been so easy, and line of sight has never been so clear. Spectrum's Flex Insight Desk has successfully expanded the limits of multi-use furniture.

Standard color combination:

Back of Flex Insight Desk with the panel removed to show the pneumatic lift-assist with the monitor all the way down. Notice the padded keyboard and mouse compartment directly under the monitor.

Back of Flex Insight Desk with the monitor fully raised. A wire loom protects the cables during travel. Note: Power strip shown is optional. 99023 or 99024 are available.

Dimensions: (height is to work surface)
 Overall (36" work station):
 36"W x 30"D x 29"H

Overall (42" work station):
 42"W x 30"D x 29"H

Overall (72" work station):
 72"W x 30"D x 29"H

(Optional Bell Glide Kit adds 1" to work surface height.)

Useful options:

98513 - Bell Glide Kit (adds 1" to work surface height)
99023, 99024 - Power Strip
