*I*nstructor's Media Console system offers the greatest flexibility in addressing classroom needs. The IMC by Spectrum offers combinations for every classroom solution.

Just as every classroom has different requirements, the IMC can be reconfigured accordingly to help manage many needs. Spectrum's wide array of rack rail options can be used to complement any audio visual arrangement with the IMC. Even special ergonomic needs are addressed with standard 29" and 36" worksurface heights.

Don't let your educational capabilities be handcuffed to classroom furniture! With Spectrum's IMC system, you can define your classroom needs and then configure your furniture to support those needs. Create a one of a kind console that will inspire your students to achieve greatness.

Due to customer request, we have developed two new additions to our our popular Instructor's Media Console, a 29"H version and the Side Shelf (**68204**). This shelf works on either height console, however it is not intended for use on a single standing Equipment Rack.

Note: We have created this console system with numerous possibilities. If you would like assistance choosing the components that best fit your needs, or a free layout of the console you designed, call us - we would be glad to help.

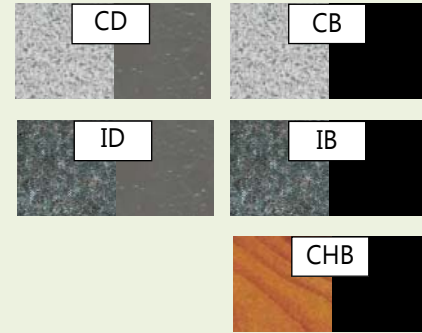

- Open areas under worksurfaces are typically used for location of Keyboard Trays and Pencil Drawers
- Wire Management Grommets are 7¹/₄"W x 3⁷/₈"D and can be replaced with Power Communications Modules **99003** or **99028**
- H = Height to worksurface

Basic worksurface components:
